

Bristol City Council

Minutes of the Transport & Connectivity Policy Committee

23 October 2025 at 5.00 pm

Members Present:-

Councillors: Ed Plowden (Chair), Donald Alexander, Rob Bryher, Nicholas Coombes, Tim Rippington, Emma Edwards, Kaz Self, David Wilcox and Jonathan Hucker

1 Welcome, Introductions and Safety Information

The Chair welcomed all attendees to the meeting and explained the emergency evacuation procedure.

The Chair asked the Committee members to introduce themselves.

2 Apologies for Absence and Substitutions

There were apologies from Councillor Morris. Councillor Hucker attended as substitute.

3 Declarations of Interest

There were none.

4 Minutes of the Previous Meeting

The minutes of the previous meeting were agreed as accurate.

5 Chair's Announcements

The Chair reported that two petition debates had been added to the agenda at short notice. These would be brought forward in the agenda to be heard following the public forum item.

The petitions had been received after the publication of the agenda and allocated to the December meeting, however, representations have been made for earlier debates so the items have been brought forward.

6 Public Forum

The Committee noted that the following Public Forum had been received.

Public Petitions

There were no public petitions received for this meeting.

Public Statements

68 statements were received and noted as follows:

Ref No	Name	Title
01	George Foster-Morison	Proposing a More Benevolent Approach to the CAZ
02	Vicki Staatz	Support for RPZ in St Andrews, Bristol
03	Bex Martin	East Bristol Unliveable Neighbourhood
04	Alice Fewtrell	SBLN
05	David Griffiths	South Bristol Liveable Neighbourhood Proposals
06	Melissa Topping - East Bristol Open Roads campaign group	EBLN end of trial
07	Mike Gifford	No to rpz
08	Jan Ratcliffe	Not enough exit and entry points for Southville north and parking spaces
09	Mark Anslow	South Bristol Liveable Neighbourhood Impacts
10	Julie Platten	Road Blocks in Southville
11	Laura Clough	Whitehouse Lane: Four Years of Disruption and Decline
12	Christian De Knock	Concerns with the South Bristol Liveable Neighbourhoods scheme
13	Sarah Hudd	Liveable Neighbourhood Schemes (South Bristol)

14	Evie Smets	Views and concerns around South Bristol Liveable Neighbourhoods
15	Nicholas Tanner	Changes to roads in South Bristol
16	Nicholas Trollope	SBLN
17	Catherine Barwell	Discriminatory - liveable neighbourhood southville
18	Paul Swanton	Access to properties in Bedminster and Southville
19	Miles William Clarke	Creating a Southville Liveable Neighbourhood Zone will be dangerous for emergency services
20	Jackie Liddle	Complete Lack of Trust in the Process of Engaging Public Opinions on the Proposed ABLN
21	James Burns	Concern over SBLN consultation bias
22	Dan Hudson	South Bristol Liveable Neighbourhood
23	Andrew Ridley	South Bristol Accessibility
24	Bruce Abrahams	Consultation on SBLN changes in Southville
25	Susie Holt	South Bristol Liveable Neighbourhood concerns
26	Lucinda Fellowes	Not-so liveable Neighbourhood in Southville
27	Ian Wardle	Urgent South Bristol Liveable Neighbourhood
28	Sarah Wardle	Urgent South Bristol Liveable Neighbourhood
29	Catherine Martin	Southville Liveable Neighbourhood proposal
30	Christine Khalif	I am very concerned about the Southville SBLN proposals
31	Andrew Green	South Bristol 'Liveable Neighbourhoods'. Stop Roadblocks,
32	Darren Baker	End of North Street Retail Trade
33	Peter Blair	Working with the people you serve in a fair and equitable way
34	Mary Carrol	Residents Parking Zone (Item 8)
35	Anne Dockery	Southville Petition
36	Alan Morris, Bristol Walking Alliance	Bristol Resident Parking Scheme Expansion Programme
37	Mo Dymond	Objection to South Bristol Liveable Neighbourhood proposals
38	Michael Henry	South Bristol Liveable Neighbourhood (SBLN) – Consultation and Process Concerns
39	Andrew Lewis	Air Pollution
40	Hannah Craven	SBLN scheme not practical for Greenbank Rd

41	Carol Casey/ Nasim Dumont	Cycling
42	Luke Tredget	South Bristol Liveable Neighbourhoods
43	Lynda Keeys	South Bristol Liveable Neighbourhood (SBLN)
44	David Redgewell	Transport Issues
45	Alison Bramall	SBLN concerns
46	Siobhan Martin	East Bristol Liveable Neighbourhood Trial Review
47	Haydn Gill	Support for EBLN and Temple Quarter
48	Peter Brooks	Spatial analysis of petition signatures against the EBLN
49	Elsbeth Patterson	South Bristol Liveable Neighbourhood
50	Elizabeth Newton	Lack of consideration for safety of children walking to Southville Primary School in proposed SBLN
51	Kelly Smallcombe	SBLN
52	Nicola Elliott	SBLN
53	Robert Duxbury	Bristol Resident Parking Scheme Expansion Programme – OBJECTION
54	Ian Herbert	The imposition of LN and LTNs has no mandate and they do the opposite of their name by damaging business and convenience for residents
55	Megs Smith	What's behind the Liveable Neighbourhood schemes?
56	Judith Thomas	South Bristol Liveable Neighbourhood Proposals
57	Jeanette Watt	South Bristol Liveable Neighbourhoods - Stop Road Blocks
58	Neil Chick	South Bristol Liveable Neighbourhoods (SBLN) – Southville North (Orange Zone) Impacts
59	Jo Sergeant	Workplace Parking Levy
60	MR SATYEN JOSHI	STATEMENT ON SOUTH BRISTOL LIVEABLE NEIGHBOURHOOD SCHEME (Ref Southville)
61	Sue Hughes	Trial extension
62	Teri Bramah	Deep concerns regarding the imposition of SBLN
63	Caroline Dunn	How is it ethical?
64	Lucy Fiddick	SBLN
65	Joshua Porter	SBLN Southville
66	Councillors Tony Dyer and	SBLN

	Christine Townsend	
67	Caroline Dunn	Transport
68	Brendan Taylor	Transport

Statements 6, 41, 44, 45, 47, 55, 59, 60 and 67 were presented to the Committee.

Public Forum Questions

56 questions were received as follows:

Ref No	Name	Title
01	Cllr Patrick McAllister	Spike Island Congestion Assessment
02	Dr James Stuart	Feeder Road cycle route
03 & 04	Robin Millard	Impact of South Bristol Liveable Neighbourhood on public transport
05, 06 & 07	Jesse Zyla	05 - Proposed Bus Gate in St Luke's Road: REASONS 06 - Proposed Bus Gate in St Luke's Road: DIRECTION(S) 07 - Proposed Bus Gate in St Luke's Road: POSITIONING
08, 09 & 10	Nicole Little	08 - Criteria for a RPZ 09 – Consultation 10 - Scope of RPZ
11 & 12	Andrew McGrain	11 – Contingency Planning for Traffic disruption post South Bristol Liveable Neighbourhood implementation 12 - Will BCC consider reassessing the effectivity of the current SBLN engagement and impose more rigor on the process?
13	Linda Geddes	Are you planning to consult St Andrews residents on any proposed extension of the RPZ?
14 & 15	Ceri Carter	14 – SBLN equality impact 15 – SBLN economic impact
16	Simon Randolph	Residents parking – environmental impact
17, 18, 19	Katherine Wale	Residents parking
20, 21, 22	Jan Ratcliffe	Southville north orange zone
23, 24, 25	Juliette Britton	Residents parking
26, 27, 28	Melissa Topping	East Bristol Liveable Neighbourhood
29, 30	Alison Bramall	Road data; Petition
31, 32, 33	Sue Hughes	East Bristol Liveable Neighbourhood
34, 35, 36	Matt Sanders	Revised Signage for the Cumberland Road Bus Gate
37, 38, 39	Lynda Keays	South Bristol Liveable Neighbourhood

40	Maita Robinson	Residents parking
41, 42,43	David Redgewell	Transport issues
44, 45	Evy Loizou	South Bristol Liveable Neighbourhood
46, 47	Dr Suzanne Audrey	South Bristol Liveable Neighbourhood
48, 49	Elizabeth Newton	South Bristol Liveable Neighbourhood
50, 51	Jo Sergeant	Workplace Parking Levy
52, 53, 54	Brendon Taylor	Transport issues
55, 56	Dan Bramall	South Bristol Liveable Neighbourhood

Those who attended the meeting were invited to ask up to two supplementary questions. The following responses were given:

Q26, 27, 28 – Melissa Topping

The Traffic Regulation Orders (TROs) within the East Bristol Liveable Neighbourhood are permanent TROs, consulted on and implemented. The current trial is focused on collecting and assessing data over the defined period. A six-month trial period has been set. Data will then be reviewed thoroughly before any recommendations for whether the scheme will remain in place. At the end of the trial, a decision will be made on whether the TROs remain in place or are revoked.

Q31, 32, 33 – Sue Hughes

The scheme is designed to ensure access to all properties at all times. If anyone experiences specific access issues, please report them directly to the officers.

Q41, 42,43 – David Redgewell

Officers will continue to engage with First Bus to address access challenges related to floating bus stops. Councillor Plowden has agreed to request this as an agenda item for the WECA Bus Advisory Panel.

(ACTION: EP)

Q50, 51 – Jo Sergeant

Officers and Councillor Plowden confirmed that there is regular engagement with neighbouring unitary authorities. It was confirmed that multiple scenarios will be modelled as part of the Workplace Parking Levy options, in consultation with the business community. A Workplace Parking Levy would apply as a charge to employers, and it is for individual businesses to determine whether any costs are passed on to employees.

Q52, 53 & 54 – Brendan Taylor

Bristol City Council is seeking feedback from MetroBus users on the use of iPoints, with no decision made at this stage. The Council is also continuing to explore funding options to maintain supported bus services beyond April 2026.

7 Urgent item - Petition debate: Stop Southville Roadblocks!

The Committee considered a petition submitted by Alison Bramall titled 'Stop Southville Roadblocks!' signed by 1,870 petitioners of which 1,510 were Bristol residents.

Alison Bramall spoke about the petition.

Councillors Edwards, Rippington, Coombes, Hucker and Bryher spoke to the Committee in response to the petition.

It was AGREED that the Policy Committee debated and noted the petition. The topic of the debate, the petitioner's views and the Policy Committee's views as per the debate were referred to the Policy Committee Chair, who would send a formal response to the petitioner after the meeting.

8 Urgent Item - Petition Debate : Halt the East Bristol Liveable Neighbourhood

The Committee considered a petition submitted by Joanna Maple titled 'Halt the East Bristol Liveable Neighbourhood Scheme' signed by 2,377 petitioners of which 1,637 were Bristol residents.

Melissa Topping spoke about the petition.

Councillors Bryher, Self, Coombes, Hucker and Wilcox spoke to the Committee in response to the petition.

It was AGREED that the Policy Committee debated and noted the petition. The topic of the debate, the petitioner's views and the Policy Committee's views as per the debate were referred to the Policy Committee Chair, who would send a formal response to the petitioner after the meeting.

9 Management and Mitigation of CRSTS Scheme Delivery

The Committee considered an information report that updated the Committee on the likely short-term impacts of constructing the City Region Sustainable Transport Settlement (CRSTS) schemes and the mitigation measures being put in place to minimise disruption.

The CRSTS program will deliver major improvements across Bristol, expanding sustainable travel options and enhancing the public realm. These changes will make it easier to walk, cycle, and use public transport. Several schemes are scheduled for completion in 2027, meaning the next two years will involve significant construction activity in the city centre and along two strategic corridors. During this

period, reduced network capacity and longer journey times should be anticipated. Mitigation measures, as outlined in the report, will be implemented throughout the works. Importantly, the modal shift needed is anticipated to begin during the construction phase.

The www.bristolonthemove.com website has been launched to keep people informed about the three major transport projects. A key focus of the communications strategy is explaining why the works are taking place, outlining the plans and timelines, and highlighting how construction may affect journeys. A comprehensive comms campaign will direct people to the website as the primary source of information. Members of the Committee welcomed the launch, noting that it will assist them in responding to enquiries from members of the public.

The following comments or clarifications were noted:

- The website will be regularly updated with details of work phases, including any pauses due to construction reasons. Contractors are being challenged to deliver at pace as well as allocate resources appropriately.
- As winter approaches, with inclement weather and darker evenings, it was noted that bus usage typically increases during winter months, while walking and cycling are more common in warmer seasons. The schemes with the larger impacts were due to begin in the spring.
- The high-level funding bid for the Transforming Cities Region will be submitted by the Combined Authority shortly. Transport & Connectivity Policy Committee Members have already received a briefing, with a further update planned for the end of the year. Detailed proposals have not yet been established.
- Councillors will be consulted as the Transport Movement Plan develops, ahead of its presentation to the Committee in the spring.
- During works, priority will be given to ensuring pedestrians have clear and safe routes. While construction will occupy some highway space, clear signage will help keep cyclists safe and inform motorists of where cyclists are likely to be positioned.
- Cllr Self requested access to the report or link for the Bristol University study referenced, which indicates that a modal shift to 55% active travel, 25% public transport, and 20% car use is required.
(ACTION)
- Regular updates will be provided to Members.

That the Transport and Connectivity Committee:

- 1. noted this report and accept that Bristol is entering a period of unprecedented works that may cause delays and congestion to support the growth of the city and that work is underway to mitigate the impact. Refer to the slide pack to see how the works will be mitigated.**
- 2. noted that the CRSTS schemes follow the Bristol transport policy and the themes identified in the One City Plan to promote and deliver sustainable transport to reduce the impact of positive city growth.**

10 Bristol Resident Parking Scheme Expansion Programme

The Committee considered a report outlining the case for expanding Bristol City Council's Resident Parking Schemes (RPS) programme. The report set out how RPS implementation can support better-managed parking across the city, prioritise sustainable kerbside uses, reduce private vehicle trips, and improve safety and environmental quality within wards.

This was a key decision report, involving expenditure of over £500k and impacting two or more wards.

The Head of City Transport introduced the report and highlighted the following points:

- The report provided policy context and details of original schemes and zones previously implemented.
- A previous review identified challenges with zone sizes and considered whether cross-zone trips should be permitted.
- An informal consultation will take place on the proposals prior to statutory consultation.
- Prioritisation criteria feeding into the delivery plan were outlined in the report.
- Parking on the Downs area will be included within proposals due to its role as a major trip generator.
- Three new RPS development slots remain, and further views will be sought from Councillors.
- The financial allocation total included £5m funded from Clean Air Zone revenues, to be recovered through pay-and-display and permit income

The following comments were made:

- Members suggested CAZ funds could alternatively support subsidised bus services and a timeframe was requested for when the funds could be repaid. It was alternatively noted that repayment would enable funding for future projects, as regenerated funds would allow reuse, unlike bus subsidies which require ongoing annual funding.
- Consideration was given to the link between Residents' Parking Schemes and Liveable Neighbourhoods, and whether these two initiatives should be applied together or separately.
- It was agreed that charges on the Downs could displace parking to surrounding streets, leading to an RPS requirement. There was also the related development of the anticipated Van Dwellers Policy. While these factors were considered for inclusion in the scope of the Parking & Kerbside Strategy Task and Finish Group, it had been agreed they should be addressed separately from the Strategy and by the full Policy Committee.
- Implementation of the delivery plan is estimated for the 2026/27 and 2027/28 financial years.
- It was re-emphasised that all schemes remain subject to public consultation.
- Members debated the appropriate cost of permits and whether higher charges could generate additional revenue for the Highways Authority, from those most able to pay.
- Members hoped sufficient pay-and-display parking would be provided near high streets to avoid negative impacts on local businesses.
- It was noted that the introduction of the first Residents' Parking Zones after 2012, alongside the Greater Bristol Bus Network, contributed to increased bus usage and reduced fares.

Following the discussion, the report recommendations were moved by Councillor Plowden and seconded by Councillor Bryher.

On being put to the vote the recommendations were CARRIED (5 voting FOR, 4 voting AGAINST).

It was APPROVED that;

- 1. That the Transport and Connectivity Committee approved the undertaking of development and implementation work for the RPS areas identified in the delivery plans subject to the necessary consultation and approvals.**
- 2. That the Transport and Connectivity Committee approved the total allocation of £7,502,000 for the RPS expansion programme of which £4,999,000 will be allocated from CAZ for development work and implementation of the areas identified in the delivery plans (subject to the necessary consultation and approvals), with a presumption that this money will be reimbursed to the CAZ funds.**
- 3. Authorised the Executive Director Growth and Regeneration in consultation with the Chair of the Transport and Connectivity Committee to award the project, in-line with the procurement routes and maximum budget envelopes outlined in this report.**
- 4. That the Executive Director Growth and Regeneration is authorised to progress scheme development, including public consultation and permit system implementation consistent with existing RPS.**

11 CAZ Exemption and Financial Support Package

The Committee considered a report that sought approval for a time limited exemption package for eligible citizens with Clean Air Zone (CAZ) non-compliant vehicles impacted by the introduction of a bus lane and bus gate on Queens Road and Park Street.

This was a key decision report as it impacted 2 or more wards.

The Head of City Transport introduced and outlined the report. In response to questions, the following points were clarified:

- Funding remains available to provide financial support for individuals upgrading their vehicles.
- Exemptions will allow eligible individuals to access the bus gate at the top end of Park Street. Similar arrangements are already in place for other bus gates, including exemptions for Blue Badge holders and within the East Bristol Liveable Neighbourhood.
- The anomaly was identified by residents after the scheme was agreed. Officers assessed the issue and developed the proposed solution.
- Concerns were raised regarding disabled access to St George's Hall, as the nearest parking would be approximately 500m away, which may be challenging for some individuals. This matter could

be addressed within the Bus Gate Exemption Policy, which is scheduled to be presented to the Committee.

Following the discussion, the report recommendations were moved by Councillor Plowden and seconded by Councillor Wilcox.

On being put to the vote the recommendations were CARRIED (5 voting FOR, 4 voting AGAINST). It was APPROVED that;

That the Committee for Transport and Connectivity:

Approved the preferred option of offering a time limited exemption, one year from date of opening of the Bus Lane and Bus Gate, and financial support package for those eligible citizens with non-compliant vehicles who are impacted by the introduction of a Bus Lane and Bus Gate at the Northern end of Park Street.

12 Cycle Hangar Policy

The Committee considered a report that sought approval to enact a target policy, as outlined in the Cycle Hangar Policy Paper, for the delivery of 400 new cycle hangars up to 2030 and to adopt the proposed position.

This was a key decision report as it impacted 2 or more wards.

The Head of City Transport introduced and outlined the report. The following points were noted:

- Priority for delivery will be given to social housing areas experiencing higher deprivation, as well as neighbourhoods with high household occupancy of terrace, flat shared, converted or commercial property types.
- Social housing is prioritised because it was often designed without storage space, whereas newer flats typically include cycle stores through planning requirements.
- The aim is to improve accessibility to transport options for those who may not have access to a car, rather than solely encouraging people away from car use.
- Some funding has been secured through the latest Active Travel Fund, with further funding expected to be coming forward.
- Suggestions for cycle hangars locations have been invited, with 500 locations received so far. It was important to install hangars where they are most needed.
- Additional on-street infrastructure, such as public bike stands on high streets and at destination areas, is also important to encourage cycling.
- Currently, user fees cover maintenance costs, with no income generation. It was suggested that future schemes could explore options for public access and private bookings via an app, subject to Councillor support and appropriateness, as a potential income source.

Following the discussion, the report recommendations were moved by Councillor Plowden and seconded by Councillor Edwards.

On being put to the vote the recommendations were CARRIED unanimously. It was APPROVED that;

That the Committee for Transport and Connectivity:

- 1. Approved the approach to future delivery and 2030 installation target set out in the attached Cycle Hangar Policy Paper.**
- 2. Authorised the Executive Director of Growth and Regeneration, in consultation with the Chair of the Transport and Connectivity Committee, to procure and award any future cycle hangar contracts in line with the maximum combined budget envelope outlined in this report.**

13 Centre Line Policy

The Committee considered a report that sought approval for a policy position that road centrelines on selected 20mph roads are not reinstated as default following resurfacing so that road safety benefits are realised, and are only reinstated where determined essential by the Road Safety Team. Alongside this, the safeguarding process for reviewing and implementing changes was presented.

This was a key decision report as it impacted 2 or more wards.

The Group Manager, Road Safety introduced and outlined the report. In response the following points were raised:

- Where possible, Ward Councillors should be informed where centre lines are not being reinstated.
- It was confirmed that painted roundels indicating speed limits and cycle markings will be reinstated.
- Each road will be assessed individually, and decisions on reinstating centre lines will be based on a technical officer's judgement and the balance of risk.
- On roads where vehicles are parked continually on both sides, centre lines often serve no practical purpose.
- The current approach has been in place for some time has not resulted in any adverse safety impacts. Previous objections were based on perceptions rather than collision data.
- Concerns were raised re learner, elderly drivers and future autonomous vehicles who may rely on centre lines.
- It is argued that removing centre lines can make drivers more alert when encountering oncoming traffic, encouraging them to assess risk. However, when that does not occur, it may increase danger for more vulnerable road users, such as cyclists.
- Some Councillors expressed concern that there is insufficient research or strong evidence to support the approach.

Following the discussion, the report recommendations were moved by Councillor Plowden and seconded by Councillor Wilcox.

On being put to the vote the recommendations were CARRIED (5 voting FOR, 4 AGAINST).

It was APPROVED that;

That the Committee for Transport and Connectivity:

- 1. Approved the policy the default position of not reinstating centreline road markings post resurfacing programmes on residential streets and selected 20mph speed limit unless there is a specific road safety concern.**
- 2. Approved the proposed process set out in Appendix A.**

14 Vehicle towing contract

The Committee considered a report that sought approval for to reprocure the Highway Maintenance Vehicle Towing Contract. The contract is essential to gain site possession to carryout Statutory Highway Maintenance and other related works in Bristol's busy urban environment. The towing contractor removes parked vehicles which remain in place despite advanced notification of the work, and places them in a neighbouring street.

This was a key decision report as it related to a decision involving over £500k.

The Strategic Highways Maintenance Team Manager introduced and outlined the report.

- It was confirmed that the contract relates to facilitating maintenance works and does not cover parking enforcement.
- The contract will include robust communication requirements. If vehicles need to be moved, the contractor will notify Bristol City Council Customer Services, Parking Services and Maintenance Teams, as well as the Police, so that drivers can be informed of the location of their car, if they call. Vehicles belonging to Blue Badge holders will be returned to their original location once works are complete.
- Procurement and Legal Officers have advised that the contract for removing vehicles to enable maintenance works is a service delivery contract, whereas the contract for removing vehicles from double yellow lines or bus lanes is a concessionary contract. Therefore, the two activities cannot be combined within a single contract.

Following the discussion, the report recommendations were moved by Councillor Plowden and seconded by Councillor Self.

On being put to the vote the recommendations were CARRIED unanimously.

It was APPROVED that;

That the Committee for Transport and Connectivity:

- 1. Authorises the Executive Director for Growth & Regeneration in consultation with Chair of the Transport and Connectivity Committee to re-procure and award the Vehicle Towing Contract, in-line with the procurement routes and maximum budget envelopes outlined in this report being £1million over 5 years.**
- 2. Authorises the Executive Director for Growth & Regeneration in consultation with Chair of the Transport and Connectivity Committee to invoke any subsequent extensions/variations specifically defined in the contract(s) being awarded, up to the maximum budget envelope outlined in this report.**

15 Workplace Parking Levy Update report

The Committee considered a report which updated the Committee on progress with the Workplace Parking Levy Outline Business Case (OBC) and to outline progress on key project milestones.

This was a report for information.

The Head of City Transport introduced and outlined the report.

- The Committee agreed to receive a further update in February following completion of the modelling forecasts and impact assessment. This update will seek Members's views to inform final development of the scheme.
- Members requested to be kept informed of any issues identified, including financial implications and potential changes to timescales.
- It was noted that the cost risk associated with future implementation of an IT system is expected to be addressed within the Outline Business Case.

The Committee for Transport and Connectivity noted the update report.

16 Quarterly Finance Report: P5/Q2

The Committee considered a report which presented the financial forecast at Period 5 (P5) against the budget as at the end of August 2025.

This was a report for information.

The Director, Economy of Place introduced and outlined the report.

In response to a question, it was clarified that the £207k risk associated with the energy price pressure on the street lighting budget relates to the cost of energy. Although this pressure will have been reduced

through the citywide transition to LED lighting, energy costs remain significant and continue to present a budgetary challenge.

The Committee for Transport and Connectivity noted the update report.

Meeting ended at 8.30 pm

CHAIR _____
