

REPORT TO: WEST OF ENGLAND MAYORAL COMBINED AUTHORITY COMMITTEE

DATE: 5 JUNE 2026

REPORT TITLE: MAYORAL COMBINED AUTHORITY AND MAYORAL BUDGET OUTTURN 2025/26

RESPONSIBLE OFFICER: DIRECTOR OF FINANCE, INVESTMENTS AND COMMERCIAL (\$73 OFFICER)

<u>Key Decision</u>	No
<u>Purpose of Report</u>	
This report represents the revenue and capital outturn for the West of England Mayoral Combined Authority Committee for the financial year 2025/26 based on data from the period April 2025 to March 2026 for both the West of England Mayoral Combined Authority and Mayoral budgets.	
<u>Recommendation</u>	
That Committee:	
1) Notes the Outturn position for the West of England Mayoral Combined Authority Revenue Budget as set out in Figure 1 including reserves, the outturn position for the Mayoral Revenue Budget as set out in Figure 12, the Capital Outturn as set out in Figure 10 and the Treasury Outturn as set out in Appendix 9.	
<u>Reasons for recommendation</u>	
Statutory Requirements and Recommended Best Practice.	
<u>Voting arrangements</u>	
Recommendation 1: None required – Recommendations are for noting with any comments.	
<u>Publication Requirements</u>	
For Publication.	

Background

- In accordance with the regular reporting timetable for updating the committee with budget monitoring information, this report sets out the financial outturn position for both revenue and capital budgets. Members of the committee are asked to note the outturn financial positions set out in this report.

Revenue Outturn - West of England MCA

2. The 2025/26 West of England MCA Revenue Budget was originally set in January 2025 with income and expenditure of £173.9m, resulting in a balanced budget. This report summarises the movement from the original budget through in-year forecasts to the final outturn position.
3. Since the budget was set, the MCA has received new funding awards and reallocated unused funds from previous years, increasing the current budget to £182.0m. As the year progressed, delivery plans were refined and aligned to programme readiness, resulting in a reduction in both expenditure and income to £174.0m at outturn. Further detail by delivery theme is provided in Figure 2 and 3, with a breakdown of grant utilisation included in Appendix 2.
4. The reduction in expenditure has increased the amount of cash available for investment, boosting the treasury management surplus for 2025/26, as shown in Figure 6. This surplus will be transferred to both the General Reserves and the Programme Risk Reserve (Appendix 5) to strengthen the Authority's financial resilience over the medium term as we begin delivering major capital schemes and managing associated risks.
5. The table below summarises the revenue outturns against the approved budget (January 2025 committee) and the current budget. Movements reflect reprofiling of funding, confirmation of new awards, and the firming up of estimates that were provisional at the time of budget setting, now replaced with confirmed figures.

Figure 1: Revenue Outturn Summary

Revenue Budget	Approved budget £000s	Current Budget £000s	Q1 Forecast £000s	Q2 Forecast £000s	Q3 Forecast £000s	Outturn £000s	Outturn vs Current Budget %
Delivery Sub Total	134,708	140,591	132,069	131,283	123,648	117,940	84%
Corporate Sub Total	17,009	17,964	17,661	18,724	17,080	15,947	89%
Net Expenditure	151,717	158,555	149,730	150,008	140,729	133,887	84%
Other Sub Total	22,172	23,435	24,545	28,724	31,387	40,109	171%
Total Expenditure	173,889	181,990	174,275	178,731	172,115	173,996	96%
MCA Revenue Funding	(173,889)	(181,990)	(174,275)	(178,731)	(172,115)	(173,996)	96%
(Surplus) / Deficit	-	-	-	-	-	-	0%

6. The final revenue outturn for 2025/26 is £174.0m, which is £8.0m (4%) lower than the Current Budget of £182.0m and £1.9m (1%) higher than the Q3 Forecast. The underspend is primarily driven by reduced delivery across programme areas as schemes have been reprofiled to align with delivery readiness.

7. The most significant variances are within Delivery, which underspent by £22.7m (16%) against the current budget, alongside a £2.0m (11%) underspend within Corporate. These reductions are partially offset by higher than anticipated movements within Other, including increased reserves movements, resulting in an overall balanced position.
8. At a delivery theme level, the largest variances are within Economy & Skills and Transport, reflecting changes in delivery profiles. Further detail is provided in the theme breakdown below.

Figure 2: Outturn by Delivery Theme

Revenue Budget	Approved budget £000s	Current Budget £000s	Q1 Forecast £000s	Q2 Forecast £000s	Q3 Forecast £000s	Outturn £000s	Outturn vs Current Budget %
Economy & Skills	61,940	52,444	44,804	42,584	39,126	40,605	77%
Environment	4,907	7,237	6,256	6,626	5,818	6,543	90%
Transport	61,605	66,704	69,538	67,887	65,196	58,231	87%
Homes & Regeneration	1,424	5,975	3,012	4,180	6,206	6,003	100%
Strategy	1,036	1,083	1,132	1,004	999	564	52%
Grant Management & Assurance	3,796	7,147	7,327	9,003	6,303	5,995	84%
Delivery Sub Total	134,708	140,591	132,069	131,283	123,648	117,940	84%

9. A summary of the underlying key variances by theme is set out in the following paragraphs:
10. **Economy and Skills Delivery:** The £11.8m (23%) variance is largely attributable to Skills Bootcamps (£7.0m). Smaller variances arise across the Mayoral Priority Scheme (£1.0m), Business Innovation (£0.8m), Connect to Work (£0.7m), UKSPF (£0.6m), Adult Skills Fund (£0.3m), Business Support Programme (£0.3m), Youth Guarantee (£0.3m) and other smaller project variance coming to (£0.8m). The Skills Bootcamps variance reflects the gap between the original budget assumption, based on 100% learner completion and delivery of outcomes in line with Department for Education grant conditions.
11. **Environment Delivery:** The £0.7m (10%) variance is primarily driven by the Green Growth West Impact Fund of £0.4m, reflecting the early closure of the programme. Unspent funding has been returned to the Investment Fund for reallocation. The remainder relates to regional delivery on Low Carbon and Retrofit activity (£0.1m), with other small variances across projects making up the remaining variance (£0.2m).
12. **Transport Delivery:** The variance of £8.47m (13%) against current budget is split between Transport Operations of £5.6m, Transport Strategy of £0.7m & Transport Delivery teams of £2.13m. Transport operations, covering buses, has seen a net reduction over bus grant, BISP & the levy allowing £8.0m to be added into reserves, helping to mitigate forecast cost pressures in 2026/27. Transport strategy has seen

underspend across the majority of its projects, which will be reprofiled into next financial year. In Transport Delivery, spend on the West Rapid Transport project was £1.7m lower than the budget, and this underspend has now been profiled into future years.

13. **Homes & Regeneration Delivery:** This area finished the year in line with budget, and successfully secured additional funding during the year, including £0.5m from Homes England in the final quarter. This funding supported the progression of the Hicks Gate masterplanning work and the development of the Western Innovation Arc plan.
14. **Strategy Delivery:** The £0.5m (48%) variance is primarily driven by underspend within the Digital Office project (£0.4m) due to reprofiling. The remaining variance is due to in UK Mayors arising from staff vacancies through 2025/26, and the Regional Evidence Portal Pilot arising in the current financial year pending completion of a change request. The associated expenditure will be reprofiled into the next financial year.
15. **Grant Management Delivery:** The £1.2m (16%) variance reflects lower than budgeted expenditure across several projects, primarily Somer Valley (£0.7m), Capricorn Quay (£0.4m), and Western Harbour (£0.3m), partly offset by smaller movements elsewhere. These variances relate to timing differences within agreed funding envelopes rather than changes to the overall funding available.

Figure 3: Outturn by Corporate Functions

Revenue Budget	Approved budget £000s	Current Budget £000s	Q1 Forecast £000s	Q2 Forecast £000s	Q3 Forecast £000s	Outturn £000s	Outturn vs Current Budget %
Corporate Office	6,543	8,042	8,092	8,035	6,874	6,456	80%
Finance, Investments & Commercial	4,689	4,748	4,160	4,952	5,039	4,272	90%
Law, Governance & Operations	3,362	3,233	3,366	3,615	3,141	3,279	101%
Strategy	2,415	1,941	2,042	2,123	2,027	1,941	100%
Corporate Sub Total	17,009	17,964	17,661	18,724	17,080	15,947	89%
Net Expenditure	151,717	158,555	149,730	150,008	140,729	133,887	84%
Business Rates Retention	23,078	23,360	23,360	23,608	23,360	23,360	100%
Net Reserves Movement	5,712	6,301	7,264	9,452	12,104	20,644	328%
Recharges Income	(6,618)	(6,226)	(6,079)	(4,336)	(4,078)	(3,895)	63%
Other Sub Total	22,172	23,435	24,545	28,724	31,387	40,109	171%
Total Expenditure	173,889	181,990	174,275	178,731	172,115	173,996	96%

16. **Corporate Functions:** This area covers Corporate Office, Finance, Investments & Commercial, Law and Governance, Operations, and Strategy, which together provide the Authority's core corporate, financial, legal, democratic, and strategic functions.

17. **The Corporate Office:** The £1.6m (20%) variance is mainly driven by lower in-year spend against the Organisational Improvement Plan (£0.8m), work is due to continue into 2026/27 and this underspend has been transferred to an earmarked reserve to cover this. Other smaller variance exists across the various service areas such as Premises, Programme Management Office and Corporate Communications but are not considered material to the overall delivery of those functions.
18. **Finance, Investment & Commercial:** The £0.5m (10%) variance is primarily attributable to centrally held corporate funding pots not utilised in year, including the write-off provision.
19. **Law, Governance & Operation:** There is a small variance of 1%, due to pressures within Legal, partly offset by lower spend on IT.
20. **Strategy:** Is in line with the current budget. Minor variances across service areas within the directorate have offset each other, resulting in an overall position in line with budget.
21. The outturn is also presented by cost category below, showing how resources are allocated across different types of expenditure and supporting consistent tracking of movements.
22. Figures 4 and 5 illustrate the main variances by cost category.

Figure 4: Cost Categories – Budget vs Outturn (£000s)

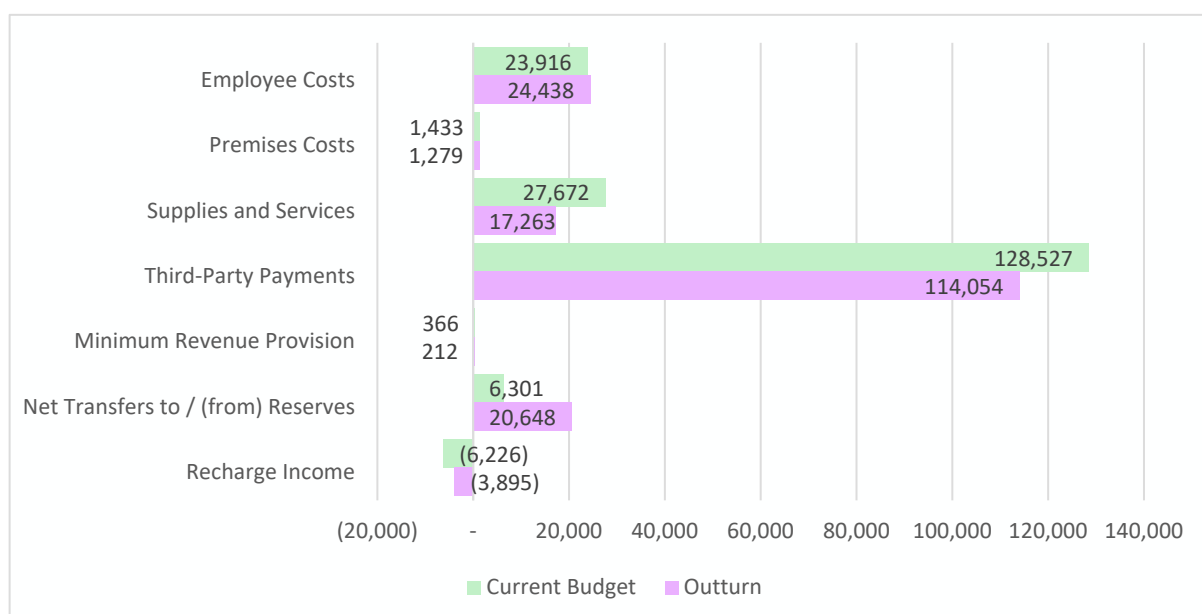

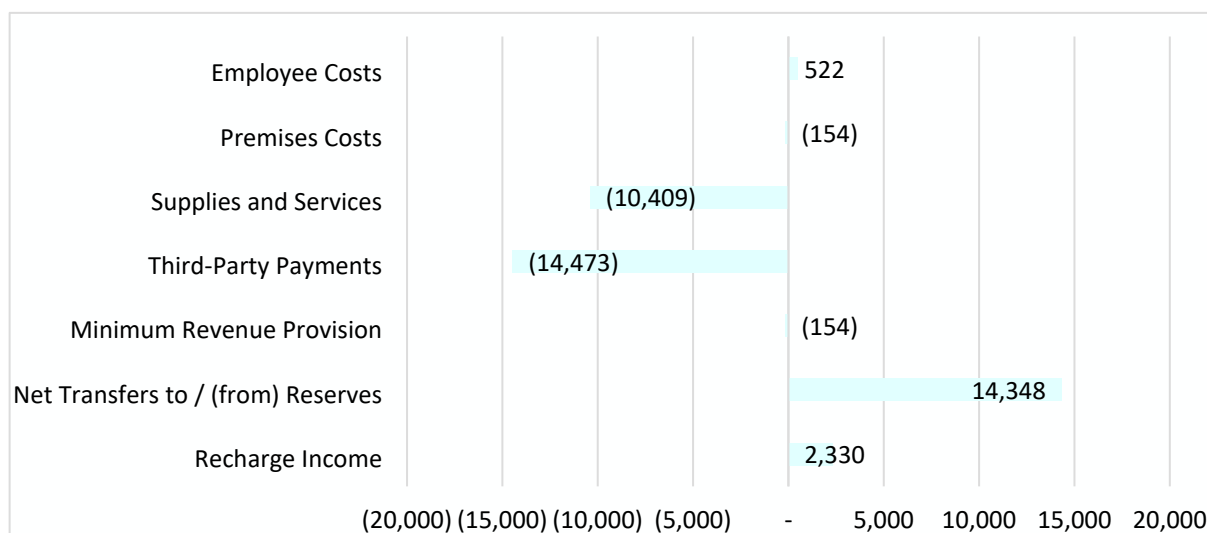

Figure 5: Variance Cost Categories – Budget vs Outturn (£000s)

Expenditure

23. **Employee Costs:** The variance shows a £0.5m (2%), increase compared to budget, due to lower vacancy rates than anticipated. This was funded through the vacancy factor reserve and project funding where applicable.
24. **Premises Costs:** The variance shows a reduced cost of £0.2m (11%) which reflects routine fluctuations with no material impact.
25. **Supplies and Services:** The £10.4m (38%) variance reflects the phasing of delivery, with lower levels of activity taking place in-year across both delivery and corporate themes. Key reductions across Economy & Skills of £4.7m include UKSPF (£1.8m), Youth Guarantee (£0.9m), Business Growth (£0.7m), and a net reduction in Transport of £3.4m, primarily reflecting lower spend on Integrated Transport and Mass Transit of (£1.7m).

26. **Third Party Payments:** The variance of £14.5m (11%) is largely due to lower than budgeted expenditure on key grant funded schemes such as Skills Bootcamps (£6.8m) which is dependent on partner performance and Bus Grant (£6.2m) where we have the option to roll funding into the next financial year.
27. **Net Transfer to Reserves:** Net movement increase of £14.4m (228%) reflects additional contributions to reserves from the treasury management surplus (Figure 7), alongside drawdowns from earmarked reserves to support delivery. Further details are set out in Appendix 5.
28. **Recharge Income:** The reduced recharge of £2.3m (37%) reflects revised recharging between Revenue, Capital, and Joint Budgets.

Income

29. Total income for 2025/26 at outturn is £174.0m, which is £8.0m (4%) lower than the current budget of £182.0m. The reflects reductions in grant income utilised in year partly offset by stronger treasury returns. Figure 6 shows the overall scale of income streams with Figure 7 showing the variance versus Budget.

Figure 6: Revenue Income Streams – Budget vs Outturn (£000s)

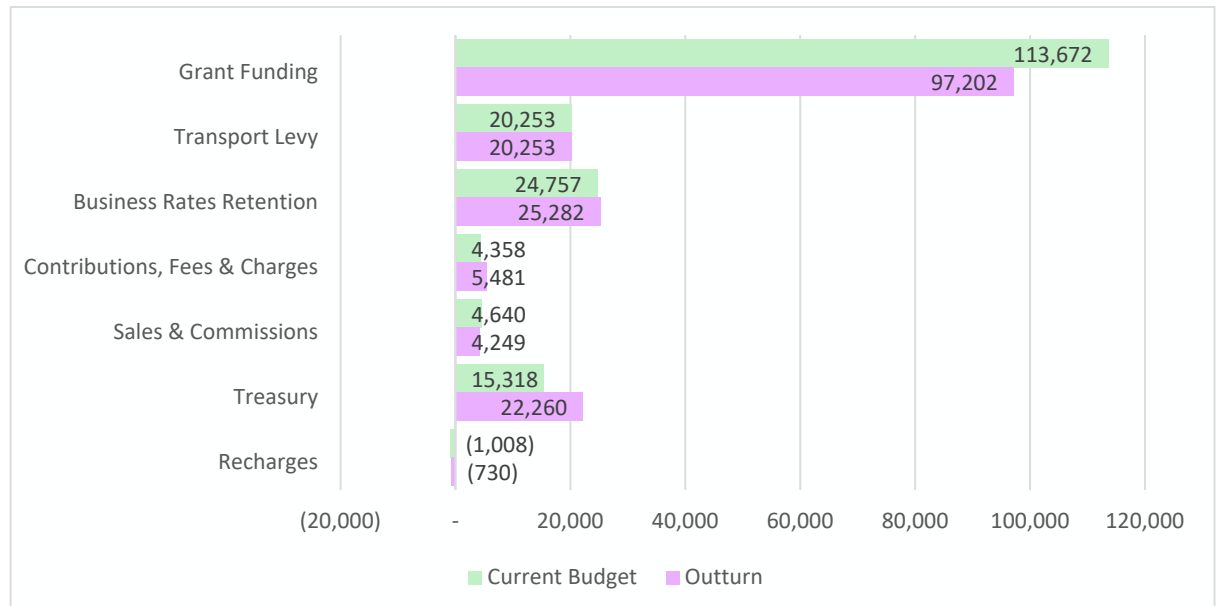

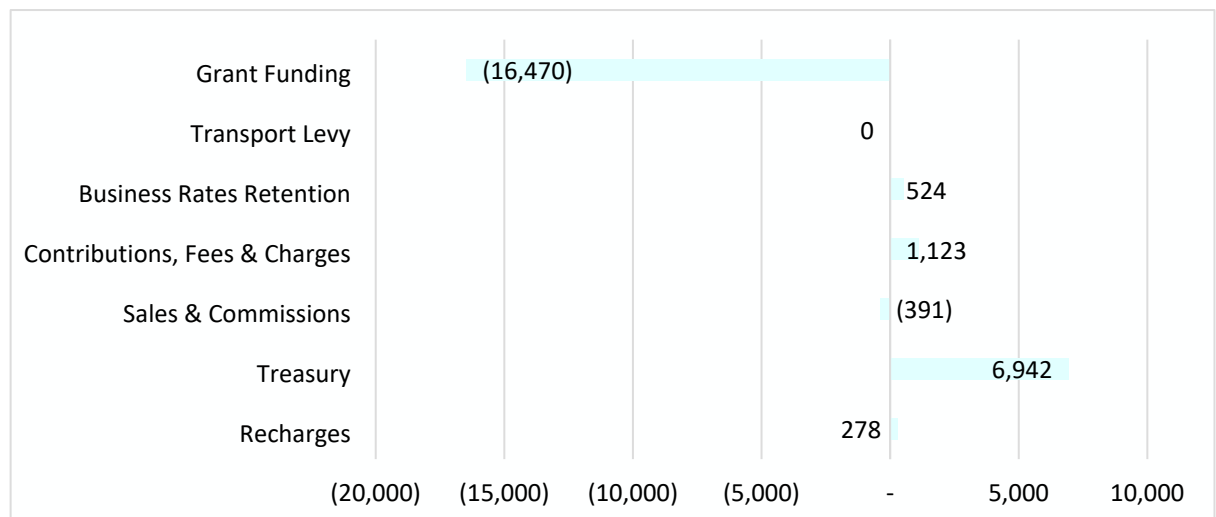

Figure 7: Variance in Revenue Income Streams – Budget vs Outturn (£000s)

30. **Grant Funding:** Grant funding remains the largest source of income at £97.2m, though this is £16.5m (14%) below the current budget. The main movements include:
- Skills bootcamp reduced by £6.9m. The Skills Bootcamps budget assumed that 100% of learners would complete training and achieve outcomes in line with the Department for Education (DfE) grant, whereas the outturn reflects lower actual learner take-up and completion.

- Investment Fund income reduced by £6.7m as project delivery plans were revised and change requests submitted.
- Adult Skills Fund income reduced by £1.4m following a reduction in grant from the DfE. The shortfall has been funded from earmarked reserves.

31. Please see Appendix 2 for a full breakdown by individual grants.
32. **Transport Levy:** The Transport Levy includes an agreed £0.3m uplift for 2025/26 and a further £0.4m underwrite provision, funded from external contributions, which was fully utilised in-year.
33. The Levy continues to be subject to significant inflationary pressures and growth in concessionary travel, particularly in relation to bus services. While resources have been managed effectively to maintain service levels in 2025/26, these pressures are expected to remain significant as services come up for renewal in 2026/27. Collaborative planning with UAs will therefore be essential in developing a sustainable approach for future years, review and engagement has already begun on this.
34. There was a £1.0m overspend in the Levy in 2025/26. The variance is primarily driven by a £1.3m overspend in supported services, offset by variances across the other delivery functions of Concessionary Fares (£0.2m), Community Transport (£0.3m), and Team and Operational Costs (£0.2m). The other delivery functions have a combined variance of £0.1m.
35. The increase in costs have been offset by £1.1m additional funding from S106, Clean Air Zone (CAZ) funding, residual Local Transport Fund (LTF), and £0.1m income from non-levy projects.
36. The net position of the Levy, resulted in a £0.6m transfer to reserves, which will be used to alleviate any cost pressure moving into 2026/27.
37. **Interest and Treasury Management:** The Treasury return outturn is £22.3m, which is £6.9m (45%) higher than budget. This reflects stronger cash balances available for investment and higher interest rates than originally assumed.
38. **Contributions, Fees and Charges:** The outturn is £5.5m, which is £1.2m (26%) higher than budget. This reflects updated delivery plans and revised assumptions on contributions. Largest of these relates to supported buses (£0.5m), other smaller variances largely offset each other.
39. **Sales and Commission:** Variance of £0.4m (8%) driven by renegotiation on the IMS scooter contract to improve service and continuity for the area.
40. **Business Rates:** Business Rates income has increased by £0.5m (2%), reflecting reconciliation adjustments following completion of prior-year NNDR3 and an additional business rates relief payment. This additional income has been transferred to the

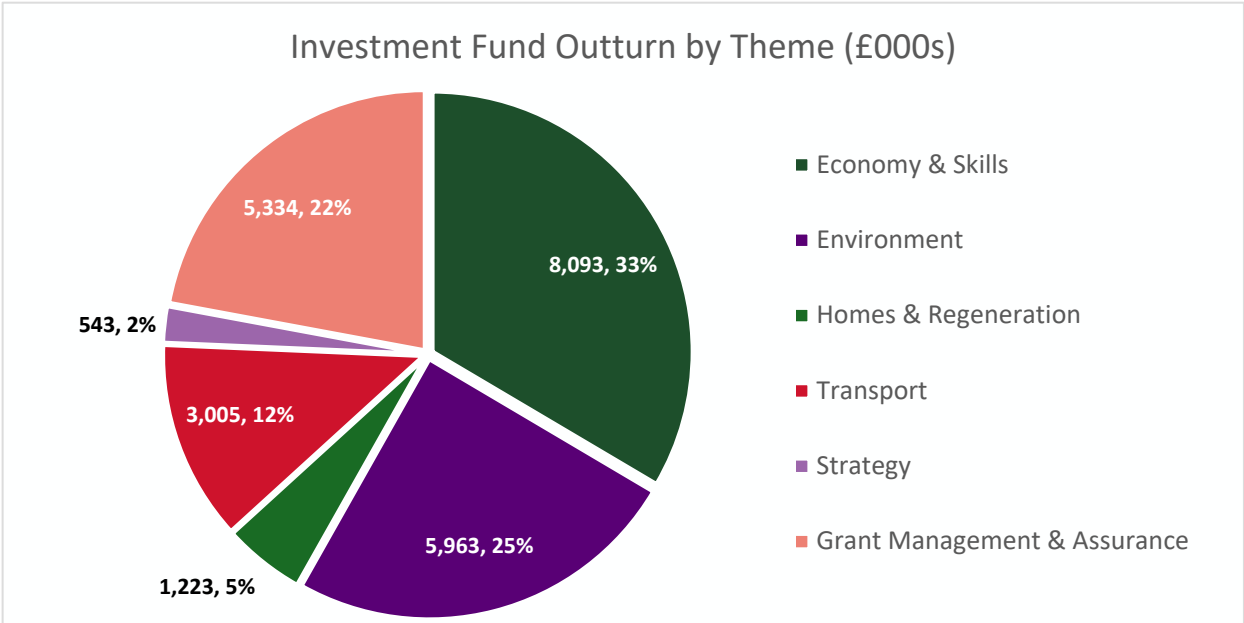

Business Rates Reserve to help mitigate future pressures associated with the anticipated baseline reset in 2026/27.

There may still be further technical adjustments following submission of finalised NNDR3 returns by UA partners, with any subsequent movements expected to flow through reserves.

Investment Fund

- 41. The Investment Fund outturn is £24.2m in 2025/26 compared to a current budget of £30.9m, representing a variance of £6.7m (22%). This reduction primarily reflects the reprofiling of projects into later years as delivery plans have been updated.
- 42. Figure 8 illustrates the outturn position by delivery theme.
- 43. Some of the key projects being delivered in 2025/26 included the Employment & Skills Service Delivery (£1.8m), West of England Business Support Programme (£1.8m), Retrofit Accelerator (£2.1m), The Regional Low Carbon Delivery (£1.1m) and MetroWest 1 & 2 Revenue Funding (£1.9m).
- 44. A full breakdown by Projects is provided in Appendix 4.

Figure 8: Investment Fund Outturn by Theme

Reserves

- 45. On 26 January 2024, the West of England MCA Committee agreed to build general reserves to a minimum target of 5% of the Revenue Expenditure Budget, in line with advice from Grant Thornton.
- 46. The table in Figure 9 sets out the position on general and earmarked reserves over recent

years, together with the outturn at the end of 2025/26.

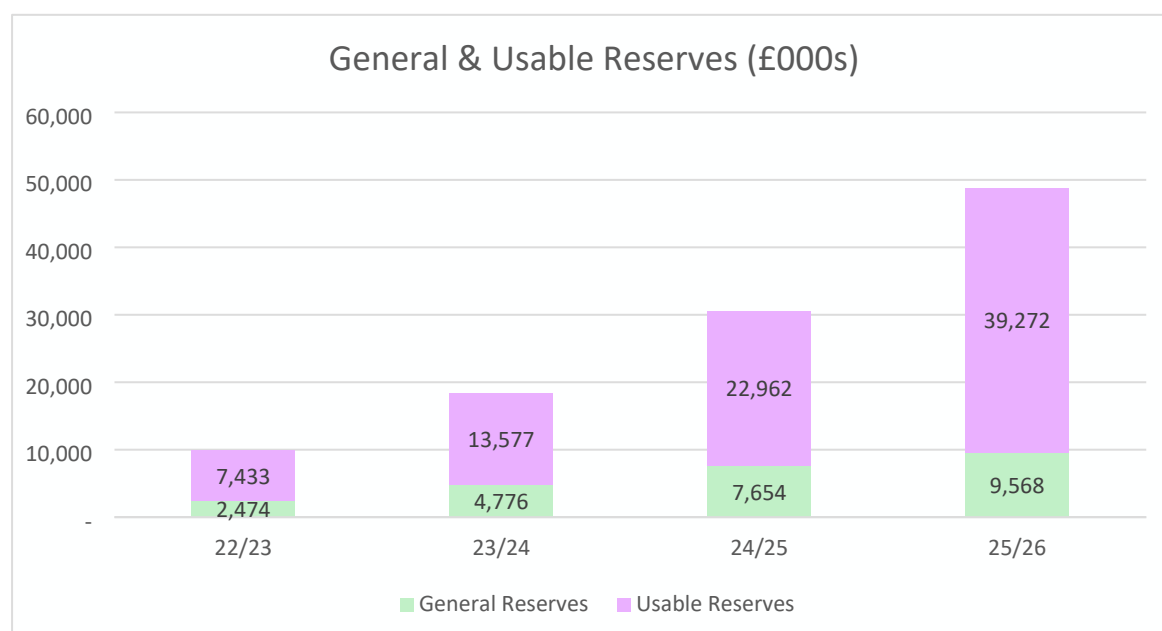

47. The outturn indicates that general reserves will stand at £9.6m by the end of 2025/26, compared to a minimum target of £8.7m. This represents a strengthening of the Authority's financial resilience above the minimum recommended level.

48. Key in year movements include:

- £1.9m added to general reserves, increasing the balance to around 6% of expenditure.
- £10.9m increase to the Programme Risk Reserve, safeguarding the Authority's position as we move into the delivery stage of several large capital schemes, particularly in Transport.
- A £2.4m drawdown from the Mayoral Election Reserve to fund the election that took place in May 2025.
- A £1.2m drawdown from Integrated Transport Reserves
- £8.0m was transferred into a new Bus Operations Reserve, to help manage future bus network pressures and ongoing increases in service and reimbursement costs.

49. Further details of individual reserves are provided in Appendix 5.

Figure 9: General & Useable Reserves balances

The West of England MCA Capital Programme Outturn

50. Capital project expenditure is £203.7m for 2025/26, which is £35.2m (15%) lower than the current budget of £238.9m.

51. Additionally, there was £0.4m spent on ICT and Office refurbishment during the year, a £0.4m (50%) saving versus budget. It is expected that this expenditure will now take place

in 2026/27 and funding has been moved to ICT Costs Reserve.

52. Figure 10 shows the outturn by delivery theme compared with the current budget. The most significant change is in Transport (£76.2m, 34%), driven by the rephasing of CRSTS and Rail programmes. The budget represents an indicative start-of-year forecast, primarily used as a baseline for in-year monitoring and tracking of capital expenditure. However, the CRSTS programme (forming the majority of the Transport capital budget) has been through a re-baselining exercise to establish firm delivery plans for the completion of the settlement through to March 2029. This ensures resources are directed towards maximising delivery within the available funding window.
53. Major changes since 2025/26 budget setting include reductions for Bristol to Bath Strategic Corridor which was expecting to go into construction in this financial year (£18.0m), Thornbury to North Bristol (£10.1m), and Charfield Station (£8.5m).
54. Figure 11 highlights the key variances by delivery theme. The reduction in Transport is of £76.3m is partly offset by the release of part of the optimism bias provision (£55.1m), reflecting lower risk levels as projects progress. Other movements include a reduction in Grant Managed projects of £12.2m (20%) as well as a £1.3m (36%) reduction in Environment.
55. A detailed breakdown of the capital budget can be found in Appendix 6 with a project level breakdown in Appendix 7.

Figure 10: Capital Programme – Budget vs Outturn (£000s)

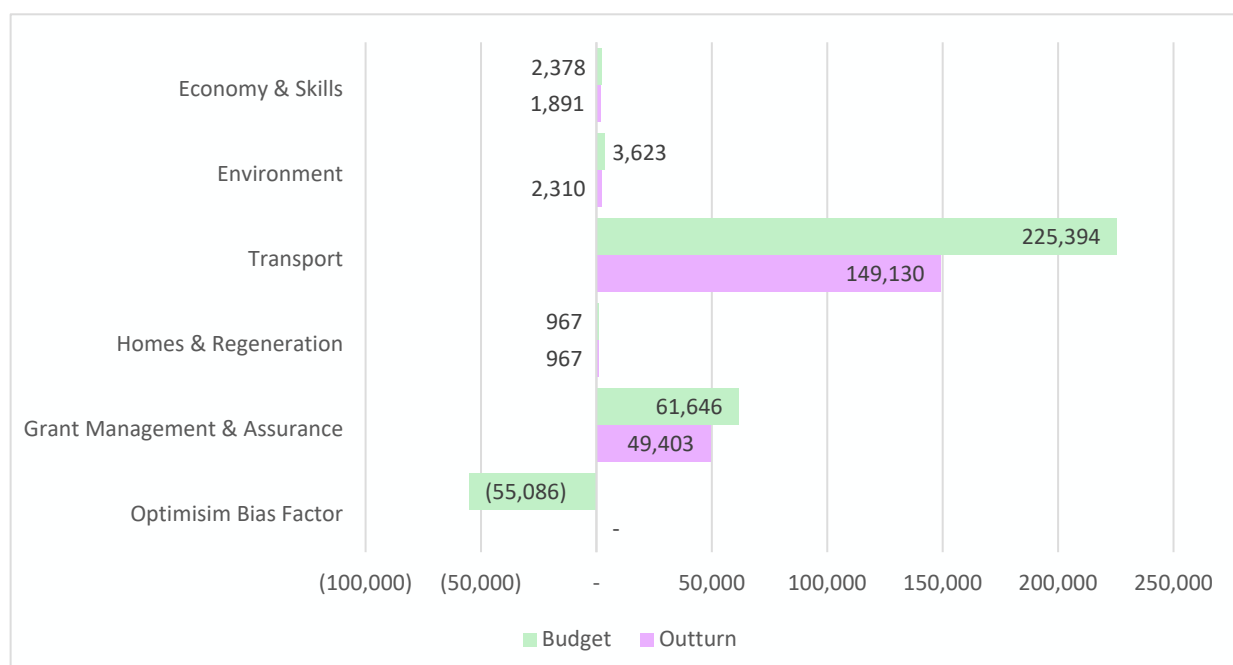

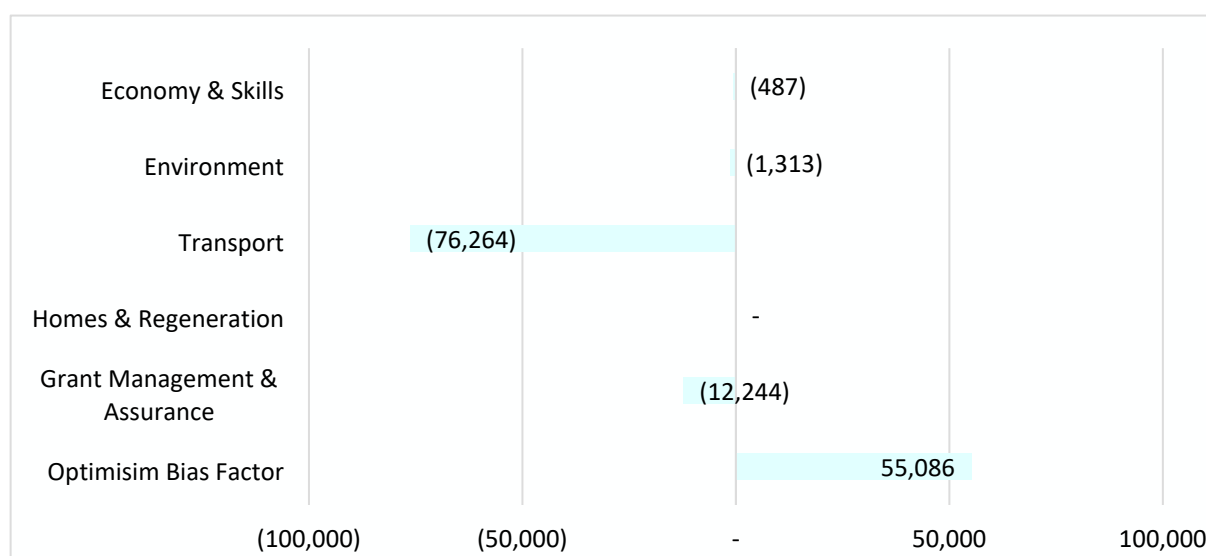

Figure 11: Variance in Capital Programme – Budget vs Outturn (£000s)

Mayoral Fund Revenue Outturn

56. The 2025/26 Mayoral Budget was approved in January 2025 on a balanced basis, with total expenditure of £3.7m. This includes £3.4m for Mayoral Election costs, funded by a £3.1m drawdown from the Mayoral Election Reserve and a £0.3m contribution from the Investment Fund. The remaining budget covers running costs, also supported by the Investment Fund. The final outturn position for the Mayoral Fund is summarised in Figure 12.
57. The Mayoral Election Costs came in £0.7m below budget.
58. Mayoral running costs are £0.3m, which is £0.1m (22%) under budget. This underspend is primarily due to lower staffing costs resulting from vacant posts in the first quarter, along with reduced expenditure on supplies and services.
59. Overall, the Mayoral Fund is to remain in balance, with the underspend in running costs

matched by a reduced call on Investment Fund contributions.

Figure 12: Mayoral Fund Revenue Outturn

Mayoral Forecast	Approved budget £000s	Current Budget £000s	Q1 Forecast £000s	Q2 Forecast £000s	Q3 Forecast £000s	Outturn £000s	Outturn vs Current Budget %

(Surplus) / Deficit	-	-	-	-	-	-	0%

Alternative Options Considered

60. Value for Money and appropriate use of resources are constantly considered when allocating, monitoring and managing all revenue and capital budgets.

Consultation and Engagement

61. Consultation has been carried out with Unitary Authority Leaders and Chief Executives as part of the drafting and review process for this report.

Key Risks

62. This report forms a core part of the governance and risk management process. The outturn presented in this report takes account of known financial risks and their potential impact on the financial position for the financial year.
63. Treasury Management Income is currently being used to fund the increase in core staffing costs, which is not a sustainable approach. As balances decline with ongoing delivery or if interest rates fall, the available funding for core costs will decrease, requiring the authority to either reduce staff or identify alternative funding sources.
64. The West of England MCA will continue to put forward a case to government to establish sustainable core funding for Combined Authorities beyond the current annual allocations (Mayoral Capacity Fund and Business Rates Pilot Scheme) and taking account of the high inflationary environment that builds into base costs without inflated funding.

65. The organisation has been building a General Fund Reserve, in line with recommended best practice, to manage / mitigate any future financial risks. However, the reserve remains at a relatively low level being circa 6% of the 2025/26 revenue budget.

Diversity, Equity and Inclusion (DEI) Implications

66. The proposals outlined in this paper present an opportunity to support inclusive growth across the region. Consideration should be given to how different communities may experience or benefit from these outcomes, particularly those who face existing barriers related to access, socio-economic disadvantage or protected characteristics. Ensuring that engagement, delivery and evaluation approaches are inclusive and informed by diverse resident needs will strengthen both the impact and fairness of the work. Ongoing monitoring of outcomes across different groups will also be important to identify and address any unintended disparities.

Health Improvement and Health Inequalities

67. The recommendations within this report are primarily financial and governance related and do not give rise to any direct health implications.
68. The Authority's delivery programmes may contribute to wider health and wellbeing outcomes, with any specific impacts considered through individual programme and project approval processes.

Climate Change Implications

69. The MCA has committed to tackling the climate and ecological emergencies, and is intent on embedding climate and nature into the growth strategy. Funding for climate and nature outcomes will also be integrated into budgets across other delivery areas of the MCA, especially transport and spatial planning. Where funds are allocated as grants to local businesses and organisations, the criteria used to prioritise funding allocations will incorporate carbon management and where appropriate, consideration of nature recovery and climate resilience opportunities.
70. The MCA will continue to work with its Treasury Advisors, Arlingclose, for support and advice through its Environmental, Social and Governance (ESG) and responsible investment service. As part of this process, we will ensure it aligns with our developing Corporate Carbon Management approach.

Finance Implications

71. All financial implications are contained within the body of the report.
72. General and earmarked reserves available to meet potential future risks remain comparatively low, and the West of England MCA will continue to manage those risks and place a strong focus on building the levels of reserves to the required levels in line with the approved reserves policy.

Legal Implications

- 73. This report monitors how the West of England MCA and the Mayoral Fund has performed against the financial targets set in January 2025 through the Budget setting process.
- 74. The Budget proposals set out in this Report have been developed in accordance with appropriate Local Government legislation and regulations, including the specific funding and related governance requirements set out in a) Part 2 of the Local Government Act 2003 (Financial Administration); b) The West of England MCA Order 2017; and c) The Combined Authorities (Finance) Order 2017.

Human Resources Implications

- 75. The outturn position reflects improved workforce stability, with employee costs £0.5m (2%) higher than budget due to lower vacancy rates than anticipated. This has supported increased organisational capacity to deliver core activity and programme priorities.
- 76. As the Authority transitions into a delivery-focused phase, workforce planning is shifting from reliance on vacancy factors to a more strategic approach aligned to the Target Operating Model (TOM), programme delivery requirements, and PMO-led oversight. This includes ensuring clarity between core and programme-funded roles and maintaining flexibility to respond to changing delivery timelines.
- 77. The continued roll forward of Organisational Improvement Plan activity into 2026/27 confirms the need for ongoing HR, organisational development, and change capability to support structural design, consultation, and implementation.
- 78. A key risk remains the reliance on Treasury Management income to support core staffing costs, which is not sustainable in the long term. This will require continued focus on aligning workforce size and structure to a sustainable funding envelope, supported by robust workforce planning and scenario modelling.
- 79. Equality, diversity and inclusion considerations remain important, with a focus on ensuring that recruitment, organisational change, and workforce planning are delivered in an inclusive and equitable way.

Land/property Implications

- 80. The West of England MCA does not currently own any land or material assets. The West of England MCA office lease at 70 Redcliff Street is accounted for within the outturn.

Commercial Implications

- 81. There are no direct Commercial implications arising from this report.
- 82. Commercial will continue to support the MCA to drive efficient and effective solutions across the MCA and directly through third party suppliers and their supply chain.

Total Usable Earmarked Reserves	7,433	13,577	22,962	16,310	39,272
Total Usable reserves	9,907	18,353	30,616	18,224	48,840

- **Business Rates Reserve:** Held to offset potential volatility in NNDR income from changes to rateable values, exemptions, or collection rates.
- **Integrated Transport Authority Reserve:** Smooths variances in concessionary fares and other transport costs between years, maintaining a revenue-neutral position with Unitary Authorities.
- **Integrated Transport Bus Reserve:** A one-off £1.3m transport underspend from 2021/22 earmarked to protect bus routes, especially in rural areas.
- **Bus Operations Reserve:** Smooths variances in bus operation costs between years, maintaining a revenue-neutral position.
- **Mayoral and Housing Capacity Reserves:** Support delivery of infrastructure and strategic housing programmes by carrying forward unspent balances from national funding allocation.

- **Programme Delivery Overhead Recovery Reserve:** Arises from central overhead savings due to delays in programme delivery.
- **Treasury Management Reserve:** Mitigates financial risks from changes in interest rates, cash balances, or pooled investment values. This includes the potential impact of IFRS 9, should the statutory override expire in March 2029 — which could require any future investment losses to be charged to revenue.
- **UK Mayors Reserve:** Ring-fenced for the M10 network of Mayoral Combined Authorities, supporting joint working through a dedicated secretariat.
- **Adult Education Reserve:** Ring-fenced for future expenditure on adult education services.
- **Programme Risk Reserve:** Provides critical cover against slippage, delay or cancellation of capital schemes. With projected annual capital spend exceeding £130.0m, maintaining a robust risk reserve is essential.
- **Transformation Programme Reserve:** Supports the ongoing organisational transformation of the Authority.
- **Integrated Mobility Fund (IMS):** Accumulates revenue share from the Tier micromobility contract. Funds will be drawn down once future use is formally agreed.
- **Redundancy Reserve:** Covers potential redundancy costs as short-term funding streams end without confirmed replacement.
- **4% Vacancy Factor Reserve:** Reflects the Authority's approach of budgeting staff costs at 96% to account for natural turnover and recruitment lead-in times.
- **Legal Reserve:** Protects against unforeseen legal costs, safeguarding core budgets and supporting robust governance.
- **Organisational Improvement Plan Reserve:** Established from underspend against budget in year 1 to fund programme activity in year 2.
- **ICT Costs Reserve:** Established from underspends on budget in year to fund activity that is planned in 2026/27.
- **Other Reserves:** Includes smaller earmarked balances such as the Brexit Fund, Cultural programmes, Solar Together, and Rent Rebate reserves.

Appendix 8 Treasury Outturn

Performance against Treasury Management Indicators (as approved in the Treasury Management Strategy Statement)

The Mayoral Combined Authority measures and manages its exposure to treasury management risks using the following indicators.

1. Security

The Mayoral Combined Authority has adopted a voluntary measure of its exposure to credit risk by monitoring the value-weighted average credit rating of its investment portfolio. This is calculated by applying a score to each investment (AAA=1, AA+=2, etc.) and taking the arithmetic average, weighted by the size of each investment.

Credit risk indicator	Target	Actual
Minimum portfolio average credit rating	A-	A+

2. Liquidity

The Mayoral Combined Authority has adopted a voluntary measure of its exposure to liquidity risk by monitoring the amount it can borrow each quarter without giving prior notice.

Liquidity risk indicator	Target	Actual
Total sum borrowed in past 3 months without prior notice	£40m	£0m

3. Interest Rate Exposure

This indicator is set to control the Mayoral Combined Authority's exposure to interest rate risk. The upper limits on the one-year revenue impact of a 1% rise or fall in interest rates will be:

Interest rate risk indicator	Limit	Actual
Upper limit on one-year revenue impact of a 1% <u>fall</u> in interest rates	£2m	£1.97m

4. Principal sums invested for periods longer than a year:

The purpose of this indicator is to control the Mayoral Combined Authority's exposure to the risk of incurring losses by seeking early repayment of its investments. The limits on the long-term principal sum invested to final maturities beyond the period end will be:

Price risk indicator	2025/26 Target	2025/26 Actual	2026/27 Target	2026/27 Actual	2027/28 Target	2027/28 Actual	+3 Years Target	+3 Years Actual
Limit on principal invested beyond 364 days as % of total cash balance	50%	14%	30%	14%	20%	11%	20%	11%

Long term investments 3 years plus include strategic pooled funds and real estate investment trusts with no fixed maturity.

The Mayoral Combined Authority's Investment position as at 31st March 2026

Table: 1 Investments by Type

	31-Mar-25 Actual Portfolio £m	Net Movement £m	31-Mar-26 Actual Portfolio £m	31-Mar-26 Average Rate %
Treasury investments by type:

Appendix 9: Project descriptions

Appendix Grouping Key:

RIFP: Revenue Investment Fund Programme

CP: Capital Programme

Appendix Name	Appendix Grouping	Description
GMA: Bath Creative Quarter	RIFP	Provides investment in developing a creative quarter to support cultural industries, regenerate the area, and drive economic growth
GMA: Bristol City Council Capacity	RIFP	Capacity funding to support Bristol City Council's ability to develop and deliver major regeneration/investment programmes. Funding to build internal capability to progress the Local Growth Plan and large-scale regeneration.
H&R: Bristol Temple Quarter (BTQ) Joint Delivery Team	RIFP	Staff resource dedicated to managing and delivering the Bristol Temple Quarter and St Philip's Marsh regeneration programme on behalf of the partners. Supports programme management and delivery of the next stage of the programme.
TRA: Bus Improvement Option Report	RIFP	Commissioned options work to identify and appraise potential bus improvement measures in the West of England. Intended to inform investment decisions and future programme development.
E&C: Business Growth Grants	RIFP	Funding provides grants to SMEs to invest in expansion, innovation, and productivity improvements to drive sustainable business growth
E&C: Careers Hub Sept 25 - Aug 27	RIFP	Continues the West of England Careers Hub, working with schools, colleges and employers to improve careers education and young people's encounters with the workplace. Funding supports coordination such as employer engagement and careers activity so education providers can better align with local labour-market needs.
H&R: City and Town Centre Evidence Base	RIFP	Feasibility and development work to create an evidence base for the West of England. Intended to inform regeneration priorities and investment by analysing data on footfall, vacancies, viability and place-based needs.
E&C: Cultural Compact Start-Up Investment	RIFP	Start-up investment to deliver the West of England Cultural Compact programme and associated regional cultural work. The funding supports capacity, governance and programme development so culture can drive economic success, placemaking and community wellbeing across the region.

E&C: Culture - Creative Recovery Programme	RIFP	Funding supports cultural and creative sector recovery initiatives to stabilise organisations, sustain jobs, and drive economic regeneration through arts and culture-led activity
E&C: Culture West - Arts	RIFP	Two-year Culture West programme designed to widen access to creative opportunities and diversify the region's creative workforce. It funds activities such as grants, commissions and partnerships to support freelancers and engage communities in arts and cultural experiences.
E&C: Culture West - Investment Fund	RIFP	Grant-funding element of Culture West used to commission and support creative freelancers and organisations. It provides small grants/commissions and delivery resource to build a more resilient, diverse creative sector and reach new audiences.
TRA: Demand Responsive Transport (DDRT)	RIFP	Part of FTZ Programme - Demand Responsive Transport (DDRT) is a flexible, on-demand public transport service where routes are dynamically generated, with funding supporting vehicles, digital booking and routing systems, and integration with wider transport networks. Looks to provide accessible alternatives to fixed bus services, improve connectivity in underserved areas, and encourage modal shifts.
STR: Digital Inclusion	RIFP	Funding supports initiatives to improve access to digital technologies, connectivity, and skills for residents and businesses to reduce digital exclusion, improve employability, and ensure equal access to online services and opportunities
GMA: EF - Midsomer Norton High Street Market Square Project	RIFP	Funds regeneration of public realm and market space to revitalise the high street and support local economic activity
E&C: Employment & Skills Resource	RIFP	Internal resource to administer and coordinate the West of England's Employment & Skills Investment Fund programmes.
E&C: Employment & Skills Service - Delivery	RIFP	Core delivery resource for the West of England's integrated employment and skills system (sometimes described as a Regional Employment Service). It supports coordination across partners and delivery of programmes so residents can access advice, training and employment support.
E&C: Employment & Skills Service – Hub (Website)	RIFP	Development and maintenance of the central online 'hub' for the regional employment and skills system. Intended to provide a single place for residents and employers to find support, including labour-market information and signposting to services.

GMA: EX – Love Our High Streets Bath Local Centres	RIFP	Provides investment in enhancing local high streets and centres in Bath to boost economic activity and community vibrancy
GMA: FE - Chew Valley Lake Recreational Trail (Southern Section)	RIFP	Supports development of recreational infrastructure to improve access, tourism, and environmental engagement around Chew Valley Lake
GMA: AG - Somer Valley EZ Development (Non-Highways)	RIFP	Supports feasibility and development work for Enterprise Zone sites in Somer Valley to unlock commercial space and regional economic growth
GMA: BA - Working Well Institute	RIFP	Feasibility and development funding to develop the Working Well Institute proposal. To deliver an inclusive skills programme aligned to regional and employer needs to support high quality employment and research led solutions to local challenges.
TRA: BF - Transport Evidence Base	RIFP	Feasibility and development work to produce transport evidence to support the Spatial Development Strategy (SDS). Includes modelling, data analysis and identification of transport interventions aligned to planned growth.
GMA: BJ - Centre for Digital Engineering Technology & Innovation	RIFP	Funds feasibility and development planning for a centre focused on digital engineering and innovation to support skills, R&D, and sector growth
GMA: BT - Strategic Master Planning - North Keynsham	RIFP	Feasibility and development funding for strategic masterplanning work in North Keynsham to support regeneration and housing growth.
ENV: BV - Strategic Green Infrastructure	RIFP	Funds planning and development of green infrastructure such as parks, green corridors, and natural assets to improve resilience to climate change, support wellbeing, and enhance ecosystems
GMA: BZ - Reboot West	RIFP	Reboot West is a regional employability programme supporting care-experienced young people. It helps participants access and sustain education, training and employment through coaching and support. Aiming to improve skills, reducing NEET levels and supporting inclusive growth.
GMA: CI Milsom Quarter Masterplan	RIFP	Supports masterplanning to guide regeneration and redevelopment of Milsom Quarter, enhancing economic vitality and urban environment
TRA: CK - 10 Year Rail Delivery Plan	RIFP	Development of a 10-year rail delivery plan setting out priorities, schemes and sequencing for improving rail across the West of England. Supports engagement with Network Rail/operators and provides a roadmap for business case development and funding bids.

GMA: DK Common Connections	RIFP	Feasibility and development work linked to the Common Connections nature recovery project, which improves habitat connectivity across the region. Funding supports planning/design work and coordination with partners to deliver nature-based interventions.
GMA: DW - Temple Quarter Regeneration Programme	RIFP	Supports strategic planning and feasibility for large-scale regeneration at Temple Quarter to unlock housing, jobs, and transport improvements
GMA: EH B&NES Housing & Regeneration Enabling Fund (Masterplanning)	RIFP	Funding to enable B&NES housing and regeneration masterplanning activity, supporting early-stage site planning and development work. This will include supporting feasibility, technical work and funding bid development to reach housing and regeneration objectives.
GMA: EQ - BANES Strategic Masterplanning	RIFP	Funds strategic masterplanning work across Bath and North East Somerset to guide sustainable growth and place development
GMA: ET - Spatial Development Strategy to Local Plan Making	RIFP	Funding to support the creation of a robust evidence base needed to move away from a strategic, region-wide planning document (SDS) toward more locally led planning via individual Local Plans
GMA: F - Temple Meads Masterplan	RIFP	Supports strategic planning and feasibility for large-scale regeneration at Temple Quarter to unlock housing, jobs, and transport improvements
GMA: FM - Western Harbour Feasibility	RIFP	Supports feasibility work exploring redevelopment options for Western Harbour to unlock housing, jobs, and infrastructure improvements
GMA: FN – Bristol Harbour Place Shaping Strategy	RIFP	Funds development of a strategic framework to guide future use, regeneration, and placemaking around Bristol Harbour
GMA: FR - South Gloucestershire Catalyst High Street Funding	RIFP	Development funding for South Gloucestershire's High Streets Catalyst work (Phase 2), supporting programme development and/or business case preparation to renew town centres.
TRA: GO Walking and Cycling Scheme Development	RIFP	Funding early-stage development of active travel schemes supporting feasibility, design and business case work to prepare projects for future capital investment.
GMA: GQ Keynsham to Willsbridge Path	RIFP	Funding feasibility work to assess a new active travel route connecting Keynsham to Willsbridge to improve cycling/walking links, connectivity, and reduce car reliance
ENV: GS - Green Recovery Fund Resources	RIFP	Internal programme resource to manage and deliver the Green Recovery Fund portfolio. Supports governance, commissioning, assurance and monitoring of funded projects.

GMA: GT Western Harbour Masterplan and Infrastructure Delivery Plan	RIFP	Funding to develop the Western Harbour masterplan and associated infrastructure delivery plan in Bristol, setting out how the area will be regenerated and what enabling infrastructure is required. Supports technical studies, engagement and delivery planning.
GMA: GV Hanham Community/Skills Hub	RIFP	Funding feasibility for a community and skills hub in Hanham to support local skills development, employment access, and community services
STR: HA - Regional Evidence Portal Pilot	RIFP	Pilot to develop a regional platform to enabling partners to access and use shared datasets for strategy and investment decisions. Intended to improve consistency of evidence and analytics across the West of England.
ENV: HE - Regional Engagement on the Environment	RIFP	Programme to build regional collaboration and engagement on environmental priorities. Funding supports convening partners, developing shared approaches and communicating opportunities for nature and climate action.
ENV: HJ - Resourcing Climate Resilience Work Programme	RIFP	Work programme resource to develop and coordinate climate resilience/adaptation activity. Supports evidence, partnerships and projects that help communities, businesses and infrastructure prepare for climate impacts.
STR: HM - Digital Office Pilot	RIFP	Pilot to establish a 'digital office' capability to coordinate digital transformation work across the West of England. Supports shared approaches to data, digital services and enabling infrastructure.
ENV: HO - Green Infrastructure Funding	RIFP	Feasibility and development funding to implement the region's green infrastructure strategy by developing a pipeline of projects and delivery mechanisms. Supports planning, stakeholder engagement and business case work to increase access to and quality of green spaces.
ENV: HR - Heat from Mines Revenue	RIFP	Feasibility and development work exploring mine-water geothermal ('heat from mines') as a low-carbon heating source. Funding supports studies and stakeholder work to identify viable sites, delivery models and next steps toward demonstrator projects.
GMA: HS B&NES CRSTS Capacity Funding	RIFP	Resource for Bath & North East Somerset Council to support delivery of the CRSTS programme. Covers capacity needed to develop and deliver CRSTS schemes (e.g., programme management, engagement, property)

ENV: IQ - WoE Wildlife Index Revenue	RIFP	Funding for development and maintenance of a Wildlife Index to measure environmental performance across the West of England, to provide robust data and evidence to inform environmental policy, biodiversity protection, and decision-making
GMA: IY - Local Nature Recovery Strategy Resourcing	RIFP	Funding feasibility/resource work to support development of the Local Nature Recovery Strategy, to identify priorities, resourcing needs, and delivery approach for biodiversity and habitat recovery
GMA: IZ - Green Heritage Home Phase II	RIFP	Funding feasibility for phase 2 of a programme retrofitting heritage homes to improve energy efficiency while preserving historic buildings and reducing carbon emissions
ENV: JA - Future of Regional Resourcing for the Environment	RIFP	Supports research and strategic planning around environmental resourcing across the region to ensure long-term sustainable funding and capacity for environmental priorities.
ENV: JF Local Wildlife Sites and 30 by 30	RIFP	Provides funding to support the identification, assessment and development of nature recovery projects, contributes to the “30 by 30” target to protect and manage 30% of land for nature, with funding used to build the evidence base and develop projects for future investment
GMA: JM Net Zero Growth Planning – Local Industrial Decarbonisation Plan	RIFP	Funding feasibility work to develop a local industrial decarbonisation plan to support businesses in reducing emissions and align economic growth with net zero targets
TRA: FTZ Mobility as a Service (MaaS) Revenue	RIFP	Future Transport Zones funding to test technology-enabled approaches that make journeys easier and reduce congestion & emissions. Funding to develop Mobility as a Service (MaaS) capability so users can plan and pay for multimodal travel through one integrated digital platform/app.
E&C: Future Bright Phase 3	RIFP	Coaching and progression support for low-income residents who are in work. Provides one-to-one holistic coaching and training to increase confidence, skills and earnings, helping people progress in employment.
E&C: Future Bright Plus	RIFP	Coaching and progression support for low-income residents who are in work. Provides one-to-one holistic coaching and training to increase confidence, skills and earnings, helping people progress in employment.

GMA: GH - GRF round 1 – Somer Valley Rediscovered	RIFP	Green Recovery Fund project to restore and connect nature in the Somer Valley through habitat improvements and community engagement. Supports landscape-scale nature recovery work and improved access to nature.
GMA: GK - GRF Nature Recovery - River Frome Reconnected	RIFP	Funding delivery of nature recovery works along the River Frome through the Green Recovery Fund, aiming to restore river habitats, improve biodiversity, and enhance climate resilience
E&C: Green Funding Future	RIFP	Linked to green careers/curriculum activity delivered through schools and the Careers Hub (often referenced publicly as the Green Futures Project/Fund).
ENV: GRF Energy Projects - Revenue	RIFP	Revenue support for delivery of Green Recovery Fund energy projects (local energy/renewables, decarbonised heat and related programme development).
ENV: HZ - Green Recovery Fund - Health and Nature Strategy Revenue	RIFP	Revenue support for developing and delivering the Green Recovery Fund's health and nature strategy work.
E&C: I4R+O BIF (non-ERDF)	RIFP	Business Innovation Fund activity within the Innovation for Renewal and Opportunity (I4R+O) portfolio, focused on helping SMEs innovate and grow. This for non-European Regional Development Fund (ERDF) elements.
STR: I4R+O Feasibility and Development	RIFP	Feasibility and development funding to scope, design and prepare Innovation for Renewal and Opportunity (I4R+O) projects and business cases. Used for early-stage research, partner engagement and pipeline development.
E&C: I4R+O Made Smarter/Supply Chain	RIFP	Part of the Innovation for Renewal and Opportunity (I4R+O) portfolio, focused on boosting productivity by helping manufacturers and supply chains adopt industrial digital technologies through advice, adoption projects and delivery capability.
GMA: HS CRSTS Mobilisation B&NES (Revenue)	RIFP	Funding to mobilise programme delivery including early works for B&ANES programmes
GMA: HV - Managing More Greenspace for Nature	RIFP	Project to improve management of additional greenspaces for biodiversity, including practical habitat enhancements and better long-term stewardship. Aims to increase nature recovery outcomes through improved land management.

E&C: IF - JB We Work for Everyone Phase 3	RIFP	Specialist employment support programme focused on helping people with learning disabilities and/or autism move into and sustain paid work. Phase 3 funding supports delivery (coaching, employer engagement and in-work support) to improve outcomes for participants.
GMA: BY South Bristol Industrial Light Workspace	RIFP	Provides investment to develop light industrial workspace in South Bristol to support SMEs, jobs, and inclusive economic growth
GMA: CG - Bottle Yard Studios - Hawkfield Business Park	RIFP	Funds expansion and development of film and TV production facilities to grow the creative industries and attract inward investment
GMA: DI - Bath City Centre High Streets Renewal Project	RIFP	Investment to renew and revitalise Bath city centre high streets, improving public realm and supporting local businesses and footfall.
GMA: DJ Bristol City Centre & High Streets	RIFP	Investment to support Bristol city centre and high streets recovery and renewal through targeted improvements and activation.
GMA: DN - South Gloucestershire Council Capacity Scheme	RIFP	Provides funding to enhance local authority capacity to deliver housing, infrastructure, and economic development projects for South Gloucestershire
ENV: EO - Community Pollinator Fund	RIFP	Fund supporting community-led actions to improve habitats for pollinators and make the West of England 'bee and pollinator capital'. Provides grants and support to local organisations to create pollinator-friendly spaces and raise awareness.
E&C: IF FS - Business Start Up	RIFP	Supports start-up programmes offering advice, mentoring, and financial support to encourage entrepreneurship and new business creation
GMA: FW - Hydrogen Sustainable Transport Economy Accelerator (revenue)	RIFP	Revenue support aimed at developing a hydrogen transport ecosystem in the region. Funds programme delivery, partnership work and early-stage project development to enable hydrogen trials and infrastructure.
GMA: GA - Waterspace Connected Phase 1	RIFP	Supports delivery of waterside infrastructure improving connectivity, public access, and economic use of waterways
GMA: GE ISTART Phase 0	RIFP	Phase 0 development funding for the I-START programme, supporting early-stage programme design, partner mobilisation and preparation for delivery. ISTART will increase skills development and research to upskill residents, promote green innovation, and support inclusive regional growth.
E&C: IF GF - WoE Business Support Programme	RIFP	Universal business support programme providing tailored advice and specialist support to SMEs across the West of England. Typically includes access to expertise (leadership/management,

		finance, HR, IP) and signposting to grants and other support.
GMA: GI - Capricorn Quay - Round 1	RIFP	Nature recovery project improving the Capricorn Quay area, creating habitat and enhancing access to nature as well as ecological enhancements and community engagement.
GMA: GJ Green Recovery Fund Nature Recovery – Forest of Avon	RIFP	Fund money allocated to environmental programmes delivered through Forest of Avon to support nature recovery, tree planting and economic growth
GMA: GL - Tree Canopy - Round 1	RIFP	Programme to increase tree canopy cover through planting and tree management, improving biodiversity and climate resilience. Funds delivery of planting and associated engagement/maintenance activities.
GMA: GN - Bath Central Riverside	RIFP	Funding linked to the Bath Central Riverside regeneration programme, aiming to enhance the area east of Bath city centre with mixed-use development and improved public realm.
GMA: HU Bathscape Landscape City Framework	RIFP	Project to develop a landscape city framework for Bath, integrating nature, heritage and place-based improvements. Supports planning and coordination to deliver nature-based as well as cultural & heritage outcomes.
GMA: HY - Pollinator Pathways Avon Wildlife Trust	RIFP	Pollinator Pathways project led by Avon Wildlife Trust to create connected pollinator-friendly habitats across the region. Funds habitat creation, community engagement and monitoring.
ENV: IM - Green Growth Fund Revenue	RIFP	Revenue line supporting development/operation of a green growth or impact investment fund for the West of England.
GMA: IR - Farmer Led Nature Recovery	RIFP	Farmer-led nature recovery project supporting land managers to deliver biodiversity improvements on farmland. Funds coordination, advice and delivery of nature-based interventions.
E&C: IL Visit West	RIFP	Regional visitor-economy programme delivered with Visit West to grow the West of England's tourism offer and spread visitor spend. It focuses on product & experience development, marketing and partnership working to increase the value and sustainability of the visitor economy.
TRA: Integrated Mobility Scooters (IMS) Phase 2	RIFP	Revenue funding supporting IMS programme delivery, technical development and stakeholder engagement for Phase 2, ensuring projects are effectively managed and ready for implementation

E&C: Innovation Infrastructure	RIFP	Investment planning work related to innovation infrastructure (facilities, networks, testbeds and/or platforms) that support R&D and business growth.
GMA: Investment Fund Gateway Review 2	RIFP	Assurance activity to review Investment Fund arrangements and/or scheme pipelines, checking value for money, delivery confidence and risk management.
E&C: IP for Growth	RIFP	Business support offer helping SMEs understand, protect and commercialise intellectual property. Provides advice, workshops and specialist support so businesses can use IP strategically to grow and attract investment.
GMA: Linking The Levels - South Gloucestershire	RIFP	Nature recovery project to connect habitats across lowland landscapes in South Gloucestershire (the Levels). Supports habitat restoration & creation to improve ecological connectivity and resilience.
TRA: Local Electric Vehicle Infrastructure (LEVI) Capability Grant	RIFP	Revenue grant that funds officer capacity and specialist support to plan and deliver local EV charging infrastructure, especially for residents without off-street parking. Supports procurement, partnerships and pipeline development for charge point rollout.
ENV: Local Energy Advice Support	RIFP	Supports advisory services helping households and businesses improve energy efficiency and reduce energy costs, aim to reduce carbon emissions, tackle fuel poverty, and support transition to a low-carbon economy
H&R: Local Growth Plan Regeneration	RIFP	Supports development of regeneration plans to drive inclusive economic growth and place-based investment
E&C: Local Innovation Partnership	RIFP	Work to develop a Local Innovation Partnership proposition for the West of England and engage with national funders and local stakeholders. Intended to secure longer-term innovation investment by aligning regional strengths, missions and delivery capacity.
ENV: Low Carbon Challenge – Recovery Fund Revenue (Projects)	RIFP	Funds projects that accelerate low-carbon innovation and economic recovery to stimulate green growth, create jobs, and reduce regional carbon footprint
ENV: Low Carbon Challenge – Recovery Fund Revenue (Team funding)	RIFP	Revenue support & team funding for low carbon programmes, intended to coordinate & enable decarbonisation activity across the region
GMA: Lower Chew Forest	RIFP	Funds development of new woodland to support carbon capture, biodiversity, and public access to green space

TRA: MetroWest 1	RIFP	Project to reopen the Portishead Branch Line and improve local rail services, including infrastructure upgrades and operational readiness for passenger services. Aims to increase rail capacity, connectivity and resilience in the West of England.
TRA: Metrowest 2 Revenue	RIFP	Revenue support for operational costs related to the MetroWest Phase 2 programme, which aims to enhance local rail services and capacity through targeted infrastructure and service changes.
E&C: Mission Maker	RIFP	Activity to create and support innovation ‘missions’—bringing partners together around priority challenges and opportunities. Funding supports programme design, stakeholder engagement and the development of mission-led projects.
E&C: Priority Skills Fund	RIFP	Priority Skills Fund investment to address skills gaps and improve access to training, including for people who are unemployed or at risk of becoming unemployed. Funding supports targeted programmes aligned to local labour-market needs.
E&C: Priority Skills Fund – Round 2	RIFP	Second round/extension of the Priority Skills Fund, providing further allocations to tackle priority skills gaps and improve employability.
E&C: Productivity Challenge	RIFP	Programme to develop and deliver interventions that raise productivity across the West of England economy.
E&C: Professional Innovation Zone	RIFP	Funding supports development of innovation zones that bring together businesses, academia, and talent to boost productivity and high-value sector growth
TRA: Rail Electrification (Filton Bank)	RIFP	Feasibility and business-case work to progress electrification of the Filton Bank corridor between Bristol Parkway and Bristol Temple Meads. The aim is to reduce electrification costs through innovation/value engineering and enable wider rail decarbonisation benefits.
E&C: Recovery Fund	RIFP	Supports a range of economic recovery initiatives aimed at strengthening business resilience, safeguarding jobs, and accelerating post-pandemic growth
ENV: Regional Low Carbon Delivery - Revenue	RIFP	Programme designed to cut emissions, lower energy bills and stimulate the low-carbon economy through grants for energy efficiency, micro-renewables and small-scale renewable energy schemes.
E&C: Retrofit & Green Skills (part of Regional Low Carbon Delivery)	RIFP	Green skills and Retrofit activity intended to grow training pathways and workforce capacity needed to deliver on Retrofit and wider net-zero programmes.

ENV: Retrofit Accelerator - Revenue	RIFP	Revenue support for the Retrofit Accelerator, which provides an end-to-end advice and guidance service for homeowners wanting to retrofit and works to grow the retrofit market. It supports independent advice, signposting and initiatives to stimulate demand and quality delivery.
E&C: Retrofit Skills and Green Skills	RIFP	Programme to build retrofit and green skills capacity in the region, supporting training pathways and employer engagement. Funding is intended to grow the pipeline of qualified people to meet demand created by retrofit and decarbonisation programmes.
H&R: SDS Spatial Development Strategy	RIFP	Work to develop the West of England's Spatial Development Strategy (SDS), including evidence, options and consultation. Supports strategic planning to guide housing, employment growth and infrastructure across the region.
E&C: Sector Evidence (defence)	RIFP	Research & evidence activity focused on the region's defence sector to inform strategy and investment decisions.
STR: Short Term Strategic Priorities	RIFP	Flexible budget line to support short-term strategic priorities that arise during the year.
E&C: Skills Connect	RIFP	Provides investment in employment and skills brokerage services connecting residents to training and job opportunities to improve workforce participation and productivity
TRA: South Gloucestershire Council Specialist Support – CRSTS R	RIFP	Resource for South Gloucestershire Council to support delivery of the City Region Sustainable Transport Settlement (CRSTS) programme. Covers capacity needed to develop and deliver CRSTS schemes (e.g., programme management, engagement, property).
H&R: Strategic Green Belt Assessment	RIFP	Supports assessment of Green Belt land to inform planning decisions and ensure sustainable development
ENV: Tidal Energy Technical Support	RIFP	Tidal Energy Technical Support provides funding to support the development of tidal energy opportunities in the West of England. Used for specialist technical, commercial and environmental work to assess feasibility, develop projects and build the evidence base needed to bring forward future tidal energy schemes
ENV: West of England Wildlife Index Revenue	RIFP	Development and delivery of a West of England Wildlife Index, a data-led approach to tracking nature recovery and biodiversity outcomes. Intended to provide consistent indicators to guide investment, policy and project targeting.

TRA: West Rapid Transport (Future4West)	RIFP	Development of a mass transit proposal for the West of England (Future4West), focused on high-capacity rapid transit corridors to improve connectivity and reduce congestion. Funding supports business case development, consultation and scheme design.
TRA: A4 Portway Sustainable Transport Corridor	CP	Focused on delivering a package of transport improvements along the A4 Portway corridor, including bus priority measures, enhanced walking and cycling infrastructure, junction upgrades, and improved connections to the Portway Park and Ride. Aims improve journey reliability, increase public transport and active travel usage, reduce congestion and support sustainable access to major employment and growth areas along the corridor.
TRA: A4018 Corridor Improvements	CP	Funding supports a package of corridor improvements on the A4018 to make bus journeys more reliable and walking/cycling safer.
TRA: Access for all - DfT	CP	Accessibility improvements at transport facilities in line with DfT Access for All programme enhancing inclusive travel.
TRA: Active Travel Fund T3	CP	Funding to deliver active travel schemes under tranche 3 improving cycling and walking routes and safety
GMA: Additional Pothole Grant	CP	Highway maintenance and resilience funding to renew assets (e.g., resurfacing, structures and critical repairs) and tackle backlog, improving safety and network condition. Delivery is through local authority maintenance programmes and targeted structural interventions (e.g., bridges)
TRA: ATF Tranche 4 Concord Way Phase 1	CP	Funding for initial improvements to a key strategic walking and cycling corridor through infrastructure upgrades to increase capacity, safety and usability
TRA: ATF3 Kingswood Town Centre Link	CP	Funding for improved walking and cycling connections into Kingswood, supporting access to local services and retail areas through enhances to connectivity and safety along key routes
GMA: ATF3 Park Row/Upper Maudlin	CP	Funding for a key central Bristol corridor, improving conditions for walking and cycling in a high-traffic environment, through infrastructure to prioritise sustainable transport modes
TRA: ATF4 BCC Deanery Road (Capital)	CP	Funding to upgrade a key city centre route to improve conditions for walking and cycling, supports infrastructure changes to reduce conflicts with vehicles and enhance connectivity into central Bristol

GMA: ATF4 BCC Filwood Quietway (Capital)	CP	Funding to create a low-traffic route designed to prioritise walking and cycling, funding supports measures to reduce through-traffic and improve safety along residential streets
GMA: ATF4 BCC Malago Greenway (Capital)	CP	Funding for improvements to an off-road walking and cycling route, enhancing connectivity and accessibility through upgrades to create a safer, more attractive active travel corridor
GMA: ATF4 BCC Old Market Quietway (Capital)	CP	Funding to establish a low-traffic route through the Old Market area, improving safety and accessibility for active travel through reduce traffic volumes and enhancements to the public realm
TRA: ATF4 Cycle Hangars: Phase 1 and 2	CP	Funds the installation of secure, on-street cycle parking across urban areas to support increased cycling uptake. Enables the rollout of cycle hangars in residential areas with limited storage, improving accessibility to cycling and supporting modal shift
TRA: ATF4 SGC Warmley to Longwell Green (Capital)	CP	Funding for walking and cycling improvements between Warmley and Longwell Green, including new routes, junction upgrades and safety measures
TRA: ATF5 Clapton Road	CP	Funding to deliver active travel improvements along the corridor to enhance safety and accessibility for pedestrians and cyclists. Supports infrastructure changes to reduce traffic dominance and create a more balanced street environment
TRA: ATF6	CP	Funding to deliver active travel schemes under Active Travel Fund 6 to improve cycling and walking infrastructure across the region.
TRA: B&NES Liveable Neighbourhoods	CP	CRSTS transport & public realm scheme that redesigns local streets so walking, cycling and public transport are easier & safer while cutting traffic & improving air quality. This programme is focused on the B&NES area.
TRA: Bath City Centre Phase 3	CP	Funding to progress further phases of Bath city centre regeneration focused on enhancing streetscape, accessibility and economic vitality through infrastructure and public realm improvements
TRA: Bath City Centre Sustainable Corridor – Phase Two	CP	Funding to deliver sustainable transport corridor improvements in Bath city centre including public realm upgrades and reallocation of road space to prioritise walking, cycling and public transport
TRA: Bath City Centre Sustainable Corridor Phase 1	CP	Funding to deliver a continuous, safer walking, wheeling & cycling route (National Cycle Network 4 upgrade & missing links) through the centre (Green Park Road area through to Pulteney Bridge).
TRA: Bath Sustainable Walking & Cycling Links	CP	Funding delivery of a package of walking/wheeling/cycling link upgrades in bath.

TRA: Bristol Bridge & VMS - acceleration of CRSTS minor advanced works - junction improvements to facilitate bus corridors for Bristol City Centre Sustainable Transport Corridor)	CP	Acceleration of CRSTS minor advanced works, junction improvements to facilitate bus corridors for Bristol City Centre Sustainable Transport Corridor
TRA: Bristol City Centre	CP	A linked package of city-centre interventions focused on bus priority measures and new/segregated cycling and walking improvements, and traffic circulation changes. Changes across the city centre to enable a new rapid transit & bus-priority route including bus lanes, bus gates, bus-only junctions and a two-way rapid-transit-only route. Joining up over 3.5km of new separated cycle paths and upgrading walking/wheeling routes and public realm across the city-centre workpackages. Also Temple Way workpackage to improving bus lane provision, a new segregated active travel route, and bus stop hubs.
TRA: Bristol City Centre - Bedminster Bridges - City Centre Strategic corridor	CP	A linked package of city-centre interventions focused on bus priority measures and new/segregated cycling and walking improvements, and traffic circulation changes. This package focuses on reconfiguring Bedminster Bridges roundabout, dedicated bus-only lanes, separated cycle routes with improved cycle links and more footway space along with enabling works that support delivery.
TRA: Bristol City Centre - Bond Street	CP	A linked package of city-centre interventions focused on bus priority measures and new/segregated cycling and walking improvements, and traffic circulation changes. Package covers new bus lanes in both directions and road widening/junction tweaks to improve bus reliability. Replacing some on-road cycling with a two-way cycling route on parallel quieter streets, plus sections of separated cycle path as well as signals / traffic management changes plus crossing upgrades and speed reduction features.
TRA: Bristol City Centre – Harbour Walkway	CP	Funding to deliver enhancements to the harbour walkway to improve pedestrian access, connectivity and attractiveness of the waterfront.

TRA: Bristol City Centre - Redcliffe Roundabout	CP	A linked package of city-centre interventions focused on bus priority measures and new/segregated cycling and walking improvements, and traffic circulation changes. This package includes widened/repaved footways, decluttering, and new signalised crossings. A separated cycle track, bus priority measures including extending bus lanes to complete a city-centre loop & smart bus signals. Also bus gates to reduce through-traffic and support the future rapid transit corridor, junction changes, upgraded bus stops and public realm improvements.
TRA: Bristol City Centre - Union Street	CP	A linked package of city-centre interventions focused on bus priority measures and new/segregated cycling and walking improvements, and traffic circulation changes. Work to introducing a two-way bus-only route for rapid transit / bus priority. Junction reworking with redesigned pedestrian crossings and bus turning movements. Two-way separated cycle paths north-south and east-west. Also public realm/greening associated with the about junction works.
H&R: Bristol Eastern Entrance (BTM)	CP	Bristol Eastern Entrance is delivering a new eastern entrance to Bristol Temple Meads station, creating a direct gateway into the Temple Quarter area (including the University of Bristol's Temple Quarter Enterprise Campus) and improving access for people approaching from St Philip's Marsh / east Bristol
TRA: Bristol Regional Cycling Hub	CP	Funding to develop the Bristol Regional Cycling Hub. The hub is intended to grow participation by providing an inclusive cycling facility and supporting WECA's mode-shift and decarbonisation goals.
TRA: Bristol to Hartcliffe Corridor - Metrobus Extension A38S	CP	Funding to develop and deliver a Metrobus extension along the A38 South corridor to improve connectivity between Bristol and Hartcliffe.
TRA: Bristol to Hengrove Metrobus extension corridor –Bedminster works at A38 and Whitehouse Lane	CP	Spending on a corridor of the A38 near Whitehouse Lane consisting of new bus stops, a new bus lane, a bus gate, additional pedestrian & cycle crossings, footway upgrades, and a segregated cycle route.
TRA: Bristol to Hengrove Metrobus Extension – Outline Business Case	CP	Funding to develop the outline business case for extending the Metrobus to Hengrove to improve public transport access and support planned growth.
H&R: Bristol Temple Quarter (BTQ) GFA	CP	Funding to acquire and prepare land within the Bristol Temple Quarter Growth Area to unlock commercial and residential development and enable long-term regeneration outcomes.

H&R: Bristol Temple Quarter (BTQ) Northern Entrance	CP	Funding to deliver a new northern entrance to Bristol Temple Meads improving station access, connectivity, and unlocking surrounding land for development within the Bristol Temple Quarter growth area
: Capital ICT Cost - 25/26	CP	Funding to deliver planned ICT capital investment for supporting system upgrades and digital infrastructure improvements
TRA: Charfield Station (capital)	CP	Funding delivery of a new rail station at Charfield (South Gloucestershire), providing a new local rail connection for surrounding villages and improving access to jobs and services.
TRA: Concorde Way MOD path ATF5	CP	Funding to enhance the Concorde Way route through MOD land, improving a key strategic active travel corridor with upgrades to provide a safer, continuous route for walking and cycling
TRA: Cotham Hill	CP	Funding to deliver improvements to Cotham Hill including pedestrianisation and public realm upgrades to support local businesses and placemaking.
TRA: CRSTS – B2B Keynsham to Bath STC	CP	The Bristol to Bath (B2B) Strategic Transport Corridor (STC) Keynsham to Bath is focused on developing and delivering transport improvements along the Keynsham to Bath corridor, including bus priority measures, active travel infrastructure, and corridor upgrades, aiming to improve journey reliability, increase use of public and sustainable transport, and support connectivity between Keynsham, Bath, and surrounding growth areas.
TRA: CRSTS 2	CP	DfT City Region Sustainable Transport Settlement (CRSTS) scheme delivering design and construction work packages and how these can be developed as we move into Transport for City Regions (TCR) funding envelop
TRA: CRSTS AB – Capacity Building Fund Bristol (capital)	CP	Capability fund within Bristol to support acceleration of transport and infrastructure schemes under CRSTS, aiming to strengthen project development, improve readiness for delivery, and ensure timely and effective rollout of major capital investments
TRA: CRSTS AC - Midsomer Norton & Westfield Walking, Wheeling and Cycling Links	CP	Funding supports delivery of a package of active travel improvements between Midsomer Norton and Westfield, providing safer and more connected walking/wheeling/cycling routes.
TRA: CRSTS AE – Portway Access & Egress	CP	Funding supports access and egress improvements on the Portway corridor with highway, junction and safety interventions for improved traffic flow, safer movements and more resilient access to this strategic route

TRA: CRSTS AF South Bristol Liveable Neighbourhood	CP	CRSTS transport & public realm scheme that redesigns local streets so walking, cycling and public transport are easier & safer while cutting traffic & improving air quality. This programme is focused on the South Bristol area.
TRA: CRSTS AK Bradley Stoke Multi Modal Corridor	CP	Supports multimodal corridor improvements in Bradely Stoke area, covering bus, walking, cycling and highway interventions for improved journey reliability, safer routes and better connectivity for communities along the corridor
TRA: CRSTS AL A4174 Multimodal Corridor	CP	Supports multimodal corridor improvements on the A4174, covering bus, walking, cycling and highway interventions for improved journey reliability, safer routes and better connectivity for communities along the corridor
TRA: CRSTS AT Thornbury to North Bristol A38	CP	Funding supports delivery of corridor improvements between Thornbury and North Bristol via the A38, building on development work for the wider route
TRA: CRSTS BB – Bristol City Centre Sustainable Corridor – Temple Way	CP	Funding supports sustainable corridor improvements on Temple Way in Bristol city centre, prioritising bus movement, walking and cycling for improved city-centre accessibility, reduced congestion and better sustainable transport connections
TRA: CRSTS D - Thornbury to North Bristol Corridor Development Costs	CP	Funding supports development costs for the Thornbury to North Bristol corridor, including feasibility, design, appraisal and business case work to progress a strategic corridor package to delivery readiness, improving future connectivity and sustainable travel options between Thornbury, the A38 and North Bristol
TRA: CRSTS E & BD A432 Multimodal Corridor Badminton Road	CP	Supports multimodal corridor improvements on the A432/Badminton Road, covering bus, walking, cycling and highway interventions for improved journey reliability, safer routes and better connectivity for communities along the corridor
TRA: CRSTS H SGC Bristol Bath Railway Path	CP	Funding supports upgrades to the Bristol and Bath Railway Path within South Gloucestershire, improving a key strategic walking and cycling route
TRA: CRSTS Ja Yate Liveable Neighbourhoods	CP	CRSTS transport & public realm scheme that redesigns local streets so walking, cycling and public transport are easier & safer while cutting traffic & improving air quality. This programme is focused on the Yate area.
TRA: CRSTS Jb Thornbury Liveable Neighbourhoods	CP	CRSTS transport & public realm scheme that redesigns local streets so walking, cycling and public transport are easier & safer while cutting traffic & improving air quality. This programme is focused on the Thornbury area.

GMA: CRSTS Mobilisation B&NES (Capital)	CP	Funding to mobilise programme delivery including early works for B&ANES programmes
TRA: CRSTS TBC A432 Multimodal Corridor Station Road	CP	Supports multimodal corridor improvements on the A432, covering bus, walking, cycling and highway interventions for improved journey reliability, safer routes and better connectivity for communities along the corridor
TRA: CRSTS Top Slice	CP	Portion of the overall CRSTS pot that is set aside centrally to pay for programme-wide costs that support delivery of the whole CRSTS programme
TRA: CRSTS U – Stockwood to Cribbs Corridor (A37/A4018) Bristol Southern Section	CP	Funding supports the southern section of the corridor with junctions, bus and active travel improvements along the A37/A4018 route for improved connectivity between, better sustainable transport options and journey reliability
TRA: CRSTS U – Stockwood to Cribbs Corridor (A37/A4018) Central (Northern) Section - WP3 Park St	CP	Strategic transport corridor (following the No.2 bus route) designed to improve bus journey times and reliability (bus priority measures, bus infrastructure, and changes that reduce bus delay), deliver safer walking/wheeling/cycling (new/upgrade crossings and segregated/safer routes) & improve safety
TRA: CRSTS U – Stockwood to Cribbs Corridor (A37/A4018) Victoria St & Colston Avenue	CP	Supports improvements on the corridor around Victoria Street and Colston Avenue, including bus priority, junction and active travel measures for improved city-centre movement, better public transport reliability and safer walking and cycling connections
TRA: CRSTS V - Streetspace 1 (Overton Road and Princess Victoria Road)	CP	Funding supports the "Streetspace" liveable neighbourhood style schemes on Overton Road and Princess Victoria Road. The programme funds business case development and delivery to reduce through traffic and make streets safer and more attractive for walking and cycling, using measures such as modal filters, timed restrictions and junction changes where agreed locally.
TRA: CRSTS W - Streetspace 2 (Rosemary Lane, Chandos Road and Denmark Street)	CP	Funding supports the "Streetspace" liveable neighbourhood style schemes on Rosemary Lane, Chandos Road and Denmark Street. The funded works are intended to make these streets safer and more pleasant by reducing inappropriate traffic and improving conditions for walking/cycling, building on earlier temporary changes (e.g., timed closures) where they have been trialled.
ENV: DBT - Low Carbon Business Support - Capital	CP	Provides capital support to businesses for low carbon technology adoption reducing emissions and improving productivity.

GMA: EX - LOHS Bath Local Centres (capital)	CP	Funding to invest in Bath's local centres through capital improvements to public realm and infrastructure to support local high street resilience.
TRA: FEAS CS – Bath Quays Bridge Cycle/Pedestrian Links	CP	Feasibility work to design improved cycle and pedestrian links around Bath Quays Bridge to enhance active travel connectivity across the river
TRA: FEAS CU – Old City and King Street	CP	Funding for a feasibility stage project for detailed design, transport modelling, heritage assessment, and stakeholder engagement to develop a deliverable scheme for improving public realm and movement in Bristol's historic Old City and King Street area, with the aim of enabling future capital works that prioritise pedestrians, enhance the evening and cultural economy, and strengthen the attractiveness and economic vitality of the city centre
TRA: FEAS CV – St George Liveable Neighbourhood	CP	CRSTS transport & public realm scheme that redesigns local streets so walking, cycling and public transport are easier & safer while cutting traffic & improving air quality. This programme is focused on the St George area.
TRA: FEAS CX – Strategic Cycle Route Connecting Yate with the East Fringe (Yate Spur)	CP	Feasibility work to develop a strategic cycle route linking Yate to the East Fringe to improve commuter connectivity and enable modal shift
GMA: FEAS DK - Common Connections Capital	CP	Green infrastructure & nature recovery programme focused on restoring, improving and connecting green spaces along the South Gloucestershire / East Bristol urban fringe
GMA: FEAS DX - Fielding's Bridge	CP	Funding for feasibility work to assess options for a new or improved bridge at Fielding's to enhance connectivity and support development.
TRA: FEAS EB - Concorde Way / Dovercourt	CP	This scheme develops an off-road, segregated walking and cycling route on the Concorde Way corridor around Dovercourt, providing a safer alternative to the current on-road section. The funded phase focuses on feasibility/design and business case work to progress the route towards delivery, supporting active travel, safety and reduced transport emissions.
GMA: FEAS EC - Grovesend Road - Gillingstool	CP	Funding supports development of the Grovesend Road/Gillingstool corridor scheme.
TRA: FEAS EP - EV Charging Infrastructure Capital	CP	Capital investment to expand electric vehicle charging infrastructure, supporting the shift to low-emission travel. Delivery involves procurement and installation of charge points and associated power/civil works.

TRA: FEAS FL - Alveston Hill Cycleway	CP	Funding is to identify and develop the best-value, high-quality option for an off-road cycleway on Alveston Hill, including connections to Thornbury town centre and the A38. Positions Alveston Hill as a primary route into Thornbury and part of the wider A38 multi-modal corridor package, intended to support safer trips and mode shift.
GMA: FEAS G-AG – Somer Valley Enterprise Zone	CP	Supporting feasibility work to assess the creation of a Somer Valley Enterprise Zone, including site suitability, infrastructure needs, and viability, aiming to develop a deliverable proposition for serviced employment sites that attract business investment, create jobs, and drive economic growth in the area.
TRA: FEAS GB - Scholars Way Walking and Cycling Route	CP	Package of walking, wheeling and cycling improvements across the south of Bath designed to connect schools/universities and residential areas via safer routes and crossings. Funded phased delivery, including new and improved crossings and route sections.
GMA: FEAS GD – Hanham High Street Improvements	CP	Funding for feasibility work to develop proposals for enhancing Hanham High Street through public realm and accessibility improvements.
TRA: FEAS GP - Muller Road Phase 2	CP	Funding for feasibility work to progress further design and development of improvements along Muller Road building on initial scheme work.
TRA: FEAS GP Muller Road	CP	Funding for feasibility work to assess transport and corridor improvements along Muller Road to enhance capacity and active travel options.
TRA: FEAS HF Rail Electrification (Filton Bank)	CP	Funding for feasibility work to assess electrification of the Filton Bank rail line to improve capacity and reduce carbon emissions.
ENV: FEAS HR - Heat from Mines Capital	CP	Feasibility and development work exploring heat from mines as a low-carbon heating source. Funding supports studies and stakeholder work to identify viable sites, delivery models and next steps toward demonstrator projects.
ENV: FEAS HZ - Green Recovery Fund - Health and Nature Strategy Capital	CP	Capital programme supporting decarbonisation and green recovery, through grants or enabling projects that reduce emissions and support low-carbon investment. Delivery is via managed grant schemes and/or direct delivery of enabling infrastructure and support services.
ENV: FEAS IQ - WoE Wildlife Index Capital	CP	Nature recovery / biodiversity capital investment to improve habitats and ecological outcomes, delivered with environmental partners and land managers. Delivery includes targeted capital works, habitat creation/restoration and monitoring of outcomes.

TRA: FEAS RB - Mass Transit - Bristol to Bath Strategic Corridor (Long Term)	CP	Development work to progress West of England mass transit on the Bristol–Bath strategic corridor (BBSC), including options development, technical studies and business case work. The programme is intended to build a pipeline of deliverable interventions that support higher-capacity, low-carbon public transport and reduce congestion.
TRA: FEAS RB - Mass Transit - Bristol to Bath Strategic Corridor (Short Term)	CP	Development work to progress West of England mass transit on the Bristol–Bath strategic corridor (BBSC), including options development, technical studies and business case work. The programme is intended to build a pipeline of deliverable interventions that support higher-capacity, low-carbon public transport and reduce congestion.
TRA: FTZ - E-scooters	CP	Future Transport Zones funding to test technology-enabled approaches that make journeys easier and reduce congestion & emissions. Pilot of shared e-scooter services to provide flexible, low-carbon transport options, with WECA funding supporting infrastructure, operations and integration into the wider transport network.
TRA: FTZ - Innovation and Enhancements	CP	Future Transport Zones funding to test technology-enabled approaches that make journeys easier and reduce congestion & emissions. Funding for the development and trial of innovative transport technologies and improvements, supporting smarter, more efficient and sustainable mobility solutions across the region.
TRA: FTZ - Knowledge Hub	CP	Future Transport Zones funding to test technology-enabled approaches that make journeys easier and reduce congestion & emissions. Creation of a data and knowledge platform to support transport innovation, collaboration and evidence-based decision making across the network
TRA: FTZ - Monitoring & Evaluation	CP	Future Transport Zones funding to test technology-enabled approaches that make journeys easier and reduce congestion & emissions. This programme is for monitoring and evaluation activity to evidence outcomes and learnings for future rollouts.
TRA: FTZ - Urban Freight	CP	Future Transport Zones funding to test technology-enabled approaches that make journeys easier and reduce congestion & emissions. The urban freight programme is trialling cleaner last-mile logistics (e-cargo bike and related urban freight pilots) to reduce van traffic and emissions.

TRA: Future Transport Zones - Data Hub	CP	Future Transport Zones funding to test technology-enabled approaches that make journeys easier and reduce congestion & emissions. Funding to develop and operate the regional Transport Data Hub, integrating and publishing real-time transport data to support operations, planning and customer information services.
TRA: Future Transport Zones - MaaS	CP	Future Transport Zones funding to test technology-enabled approaches that make journeys easier and reduce congestion & emissions. Funding to develop Mobility as a Service (MaaS) capability so users can plan and pay for multimodal travel through one integrated digital platform/app.
TRA: Future Transport Zones - Mobility Zones	CP	Future Transport Zones funding to test technology-enabled approaches that make journeys easier and reduce congestion & emissions. Place-based 'Mobility Zones' (including Travel/Mobility Hubs and micromobility integration) to make switching modes easier and support car-free short trips.
TRA: Future Transport Zones – Programme Management Capital	CP	Funding to support capital programme management for Future Transport Zone projects enabling delivery of innovative transport schemes.
GMA: GH - GRF Nature Recovery - Somer Valley	CP	Nature recovery & biodiversity capital investment to improve habitats and ecological outcomes in the Somer Valley
GMA: GK - GRF Nature Recovery - River Frome Reconnected	CP	Funding delivery of nature recovery works along the River Frome through the Green Recovery Fund, aiming to restore river habitats, improve biodiversity, and enhance climate resilience
ENV: Green Recovery Fund Investment Advisory Service	CP	Capital programme supporting decarbonisation and green recovery, typically through grants or enabling projects that reduce emissions and support low-carbon investment.
ENV: GRF Energy Projects - Capital	CP	Funding to deliver capital energy projects aimed at improving energy efficiency and supporting low carbon infrastructure.
GMA: Highways Maintenance Grants	CP	Highway maintenance funding to renew assets, tackle backlog and improving safety and network condition. Delivery is through local authority maintenance programmes.
GMA: HV Managing More Greenspace for Nature	CP	Expanding nature-friendly management of council green space, creating new habitats such as ponds, restoring river habitats and mobilising volunteering and skills development to improve biodiversity and ecological connectivity across the city.
GMA: IF BY - South Bristol Industrial Light Workspace	CP	Funding to deliver new light industrial workspace in South Bristol to support SME growth, protect employment land and create jobs.

GMA: IF CG - Bottle Yard Studios - Hawkfield Business Park	CP	Funds expansion and development of film and TV production facilities to grow the creative industries and attract inward investment
GMA: IF CH - North Keynsham Land Acquisition Fund	CP	Funding to acquire strategic land in North Keynsham to enable future mixed-use development and unlock housing and employment growth opportunities
GMA: IF CI - Milsom Quarter (capital)	CP	Funding to deliver capital works within the Milsom Quarter to transform underused assets into vibrant mixed-use space supporting economic growth.
GMA: IF DH – Chew Valley Recreational Trail	CP	Funding to create a recreational trail through Chew Valley providing new walking and cycling routes while enhancing tourism and access to natural assets
GMA: IF DI - Bath City Centre High Streets Renewal Project	CP	Investment to renew and revitalise Bath city centre high streets, improving public realm and supporting local businesses and footfall.
GMA: IF DJ Bristol City Centre High Street Recovery & Renewal	CP	Funding to deliver targeted interventions across Bristol city centre high streets to revitalise retail areas and improve public realm.
GMA: IF DR Thornbury Hospital Site	CP	Funding to redevelop the Thornbury Hospital site to bring forward new uses including housing or community facilities and support local regeneration.
GMA: IF EJ - Kingswood Regeneration Project	CP	Funding to deliver regeneration interventions in Kingswood town centre to improve public realm, attract investment and enhance economic vitality.
GMA: IF EL - Portway Park and Ride	CP	Funding to deliver enhancements to Portway Park and Ride including increased capacity, improved facilities, and better integration with bus services, aiming to boost public transport use into Bristol city centre and reduce congestion on key arterial routes
TRA: IF EM - Somer Valley Links	CP	Somer Valley Links is a transport corridor programme improving connections between the Somer Valley (Midsomer Norton/Westfield/Radstock) and Bath/Bristol through bus priority, junction upgrades and active travel measures. Progressing options and delivery planning (including early contractor involvement) to improve reliability, safety and access while supporting mode shift and lower-carbon travel.
TRA: IF EM - Somer Valley to Bristol and Bath	CP	Funding to deliver transport improvements linking Somer Valley with Bristol and Bath improving connectivity and supporting economic growth.
GMA: IF ES - Bath River Line Phase 1	CP	Funding to deliver the first phase of the Bath River Line creating riverside walking and cycling routes and improving access to the River Avon corridor.
TRA: IF GC - Old Market Gap	CP	Funding to deliver redevelopment of the Old Market gap site to create new mixed-use development and complete the urban fabric.

GMA: IF GI - Capricorn Quay - Round 1	CP	Nature recovery project improving the Capricorn Quay area, creating habitat and enhancing access to nature as well as ecological enhancements and community engagement.
GMA: IF GL - Tree Canopy - Round 1	CP	Programme to increase tree canopy cover through planting and tree management, improving biodiversity and climate resilience. Funds delivery of planting and associated engagement/maintenance activities.
GMA: IF GM - Arena Infrastructure Package	CP	Funding for a package of walking & cycling route upgrades plus traffic management (signals/ITS) works to support access to the arena site in the Filton/Brabazon area.
TRA: IF GX CRSTS Specialist Support	CP	Funding supports specialist technical, commercial and programme support required to develop and deliver CRSTS schemes
GMA: IF HU Bathscape Landscape City Framework	CP	Project to develop a landscape city framework for Bath, integrating nature, heritage and place-based improvements. Supports planning and coordination to deliver nature-based as well as cultural & heritage outcomes.
GMA: IF HY - Pollinator Pathways Avon Wildlife Trust	CP	Nature recovery project led by Avon Wildlife Trust to restore and create pollen-rich habitats.
GMA: IF IM - Green Growth Fund Capital	CP	To establish and invest in the Green Growth West Net Zero Impact Fund, using public 'cornerstone' funding to attract significant additional private sector capital into the region- to invest in net zero industries and mid-scale green infrastructure and growth ready businesses.
GMA: IF IR - Farmer Led Nature Recovery	CP	Farmer-led nature recovery project supporting land managers to deliver biodiversity improvements on farmland. Funds coordination, advice and delivery of nature-based interventions.
E&C: IF IS - Kingsley Hall	CP	Kingsley Hall Redevelopment project that supports the redevelopment of Kingsley Hall.
GMA: IF M - Hengrove Park Enabling Infrastructure	CP	Funding enabling infrastructure at Hengrove Park to unlock and accelerate a major housing-led regeneration scheme including new homes and a public park.
: IT Equipment and Infrastructure	CP	Funding to invest in IT equipment and digital infrastructure to support organisational capability and service delivery.
ENV: Low Carbon Challenge - Green Recovery Fund Capital	CP	Programme designed to cut emissions, lower energy bills and stimulate the low-carbon economy through grants for energy efficiency, micro-renewables and small-scale renewable energy schemes. The capital programme is split out by funding allocation.

ENV: Low Carbon Challenge - Recovery Fund Capital Grant	CP	Programme designed to cut emissions, lower energy bills and stimulate the low-carbon economy through grants for energy efficiency, micro-renewables and small-scale renewable energy schemes. The capital programme is split out by funding allocation.
TRA: M32 Sustainable Transport Corridor and Hub	CP	Major corridor improvement scheme to increase public transport reliability and active travel, through junction changes, bus priority and safer walking/cycling facilities. Delivery is via design, traffic regulation/consents where needed, and construction in phases.
E&C: Made Smarter - Capital	CP	Funding supporting manufacturing SMEs to invest in digital technology and equipment, improving productivity, competitiveness and growth.
E&C: Made Smarter Adoption Programme - Capital	CP	Funding for manufacturing SMEs to adopt & implement new digital technologies & equipment
TRA: Maintenance Challenge Fund – Manvers Street Cleveland Bridge	CP	Funding for essential structural maintenance and strengthening works to Cleveland Bridge and associated infrastructure, ensuring continued safe operation and extending the asset's lifespan
TRA: Maintenance Challenge Fund – New Cut Bridges	CP	Fund allocation for maintenance and refurbishment of bridge assets along the New Cut corridor, addressing structural issues and ensuring long-term safety and reliability of the transport network
TRA: Maintenance Challenge Fund – SGC – A38 & A432	CP	Fund allocations for major maintenance and renewal works on key strategic routes (A38 and A432) within South Gloucestershire, addressing structural deterioration and improving network resilience and safety.
ENV: Mayoral Renewables Fund Capital	CP	Funding to invest in renewable energy generation projects to increase clean energy supply and support net zero commitments.
TRA: Metrowest 1 - NR	CP	Funding to deliver MetroWest Phase 1 rail enhancements improving suburban rail services and connectivity across the region.
TRA: MetroWest Phase 1	CP	Rail enhancement programme (MetroWest) to introduce or improve local rail services, requiring DfT/Network Rail approvals and delivery through staged design, consents and construction. Capital spend supports infrastructure and enabling works needed to run the planned service pattern.
GMA: Midsomer Norton High Street Market Square Project	CP	Funding to deliver improvements to Midsomer Norton Market Square including public realm upgrades to boost town centre activity and local economy.

GMA: Network North	CP	Additional pothole funding allocated to Mayoral Combined Authorities (MCAs) is used to fix potholes, resurface local roads, repair cycleways, and improve general highway maintenance
Optimism Bias Factor	CP	Optimism bias provision applied to major capital schemes to reflect delivery risk and cost uncertainty. This is not a standalone project delivering outputs, but a budgeting mechanism used to manage risk across the programme.
: Phase 3 Refurb - Redcliff	CP	Funding to deliver phase 3 refurbishment works to Redcliff buildings modernising assets and improving usability
GMA: Quantum Technologies Innovation Centre (QTIC+)	CP	Funding to develop and expand the Quantum Technologies Innovation Centre through delivery of specialist R&D facilities and enabling infrastructure, aiming to position the West of England as a leading hub for quantum innovation, attract private investment, and create high-value science and technology jobs
ENV: Regional Low Carbon Delivery - Capital	CP	Programme designed to cut emissions, lower energy bills and stimulate the low-carbon economy through grants for energy efficiency, micro-renewables and small-scale renewable energy schemes. The capital programme is split out by funding allocation.
GMA: RIF Bristol Avon Flood Strategy-Active Travel & Green Infrastructure Greenway	CP	Funding to deliver a greenway alongside flood mitigation works on the River Avon integrating active travel routes with environmental resilience.
E&C: Rural England Prosperity Fund (Capital)	CP	Funding programmes supporting small-scale infrastructure and investment in rural areas across the West of England. Focuses on improvements to business premises, community assets and visitor infrastructure, aiming to boost productivity, support local businesses and strengthen rural economic resilience.
E&C: Rural England Prosperity Fund (Capital) - 25/26	CP	Funding programmes supporting small-scale infrastructure and investment in rural areas across the West of England. Focuses on improvements to business premises, community assets and visitor infrastructure, aiming to boost productivity, support local businesses and strengthen rural economic resilience.
TRA: SGC Cycle Storage	CP	Funding to install secure cycle storage infrastructure across South Gloucestershire to support cycling uptake and modal shift.

TRA: Step Free Stations (Capital) - FEAS BX / CRSTS C	CP	Accessibility upgrade programme to deliver step-free access at stations (lifts/ramps/footbridges and associated works), improving inclusion and interchange. Delivery in partnership with Network Rail and station stakeholders through detailed design, approvals and construction.
TRA: Tap on Tap Off - IF EI / CRSTS A	CP	Contactless ticketing system enabling tap-on/tap-off travel across the network, with WECA funding supporting rollout to improve accessibility and increase public transport use
E&C: UK Shared Prosperity Fund (UKSPF) Capital	CP	UKSPF, supporting local investment projects that align to the UKSPF investment plan priorities across 3 themes of Communities and Place, Supporting Local Business & People and Skills. Delivery is via grant allocations and capital spend on approved projects, administered through WECA and/or local authorities.
E&C: The UK Shared Prosperity Fund (UKSPF)	CP	UK Shared Prosperity Fund (UKSPF) capital line supporting local investment projects that align to the UKSPF investment plan priorities across 3 themes of Communities and Place, Supporting Local Business & People and Skills. Delivery is via grant allocations and capital spend on approved projects, administered through WECA and/or local authorities.
TRA: West of England Regional Transport Model (WERTM)	CP	WERTM is the West of England Regional Transport Model — WECA's strategic, multi-modal transport forecasting model used to test major schemes and policies across the region (roads, bus, rail, active travel)
TRA: West Rapid Transport (Future4West)	CP	West Rapid Transport (Future4West) is a mass rapid transit programme to develop a high-quality enhanced public transport system across the West of England. Supporting modal shift, helping tackle the climate emergency, and unlocking housing and employment growth.
TRA: ZEBRA 2 Hengrove Electrification	CP	Zero Emission Bus Regional Areas (ZEBRA) funded programme to support bus electrification, including depot/charging infrastructure and enabling works linked to zero-emission buses. Delivery is through grant agreements and infrastructure installation to reduce tailpipe emissions on key routes.
